Re: Docket # E-00000C-11-0328

ORIGINAL

Dear Commissioners,

Thank you for your reply to the letter I sent dated April 2, 2014. Your April 17th response stated: "The present Commissioners and staff are very sensitive to the comments from customers. They are doing everything within their authority to protect the consumers of Arizona." With all due respect, this is nothing less than anyone would surmise or even "expect" coming from the one(s) that are the authority. Is it not the explicit mandate, under law, that this Commission be the defining, end all, stop gap to terminate any, and all, actions or practices that would or could bring harm and or suffering unto any of the People under its charge? [Also the Arizona State Attorney General.]

Stating in your letter that you are "doing everything" is quite a broad and sweeping terminology. How about starting with (1) thing that you are really doing. On this end of things it appears you are doing nothing. Albeit awaiting a recommendation from the Arizona Department of Health. What do they know of EMF/Radio/Microwave frequency pollution and its destructive ramifications on ALL living tissues? Just ask them – they'll probably tell you it's out of their league. Hopefully, they will get up to speed and set the record straight. We all need to get "up to speed" catching up the regulatory "authorities" across the board. Allowing forced installations at military speed of these bogus "smart" meters while you investigate makes no sense at all. Please tell me how this unseemly backwards order is justified by this Commission.

The misinformation and fraudulent claims by which this whole ill conceived "smart" meter debacle is being rammed down the Peoples throats is squarely in your corner to regulate. Quite frankly, no one need be ordained by any other man's "authority" to tell the truth. They only need the fortitude to be honest. Accompanied by the courage and humility to do the fact checking. No opinion necessary – the facts speak so perfectly well all by themselves.

Respectfully,

Stan Kingman
