DOCKETED BY

Hello,

I do not wish to have a smart meter installed at my place of residence for the following reason(s):

1. 1. Health Risks
2. Invasion of Privacy
3. Cyber-Security Risks
4. Risks of Damage to Electronics Equipment and/or Appliances
5. Smart Meters not UL listed
6. Risk of fire

Those who have received a smart meter have not seen any reduction of charges and, currently, there is no opt-out offered. Should an opt-out involving fees for such be implemented, it would cause undue financial hardship for many.

I ask that you bring to the table a serious discussion allowing for an opt-out for any reason at NO ADDITIONAL COST to the consumers/citizens of Eagar/State.

My wife sleeps less than 3 feet from the meter and being senior citizens do not need more health problems. There have been so many reports of health problems after the so called "SMART METER" was installed that we do not want one at our home. One should have the right to control what is installed at our home. The only recourse would be for us to invest in a costly solar system and tell NEC to come get their meter.

Sincerely,

Allan Kruger [aok@frontier.com](mailto:aok@frontier.com) 928-333-2082
