REF, DOCKET # W-01782A-14-0084

To the commission hearing the rate increase for Abra Water co inc.

I fill that an increase of over %1.3 is uncalled for, when on a fixed income and the federal government says that the COLA. in this country is only %1.3 then the Abra water co should be held to just that.

When I drive around the area, yes one might see them digging for new lines, but that is also for future income. And should not be passed on to it's already excising costumers.

Abra water co inc. is a L, L, C. and if they want or need more money, then they should go public with there stocks.

Yes the Abra water co, inc is mostly based on residential, but it also has a large say into the way the valley real state is deviated and sold, and there for lot's are not set up for a well.

So I ask you to take all of this in your though process when you make your dissension.
