Arizona Corporation Commission  
DOCKETED

MAY 28 2014

April 20, 2014

**ORIGINAL**

DOCKETED BY 

Ref: Docket # WS-01303A-14-0010

I am asking The Arizona Corporation Commission to deny Epcor Water Company a water and sewer rate increase as they have requested.

Everyone I have talked to is either struggling to keep their business doors open or roofs over their heads. It is incredible that a thriving corporation is requesting more of my money so that they can continue to operate business as usual. Epcor Water Company needs to operate more efficiently by cutting spending and waste. I have done this in both my personal and professional life, and expect nothing less from a big corporation that has the power to shut off one of life's essential elements by making it unaffordable. Raising fees and taxes is not the answer.

The commission approved a rate increase right before this Canadian company bought Epcor and from the perspective of a consumer, there has been no improvement. The water here is undrinkable, and has been suspected in the deaths of several pets of people I know.

I know I do not stand alone in this endeavor. Please accept this letter as my official request to deny Epcor's request for a water and sewer rate increase.

Sincerely,

Walt Keza
