Dear Corporation Commission,

I am writing you to complain about the REST charges that Sulphur Springs Valley Electric Co-op (and possibly other utilities) is charging members to subsidize solar projects in our area.

Monies are subsidizing systems that are not connected to the grid, many people are benefiting from this even though they have chosen to live where there is no power available. It's a great deal for them but at the expense of SSVEC members.

The part that is UNFAIR is that these people that benefit are not being charged the monthly REST fee that everyone else is. I don't think they even have to sign the paper that states they will not sell power back to SSVEC even if they (SSVEC) install power later.

Since they are not connected to the grid they get no monthly bill and pay no fees or taxes. If they take money from the utility to pay for part of their solar system, they should be charged a monthly REST fee just as everyone else on grid is, to be fair.

If SSVEC is paying for (subsidizing) and claiming (off grid units) as part of their system of "Green Energy" they should pay the monthly fee.

I would like to see this issue addressed on your website under the Public Comment section.

Before seeking legal counsel about this problem.
