Re: Cox Arizona Telcom, L.L.C. Access Services Tariff T-03471A-14-0191
Docket Number T-03471A

To Whom It May Concern:

Enclosed for your review is an original and thirteen copies of the revised pages for Cox Arizona Telcom, L.L.C.'s (Cox's) Access Services Tariff (ACC Tariff No. 2). This filing is intended to revise service under Cox's Access Services Tariff as outlined below:

| Pages Changed | Description of Changes |
|---------------|--|
| 1 | Revised Check Sheet |
| 43 | Revised VoIP-PSTN Language |
| 43.1-43.3 | Add PVU Reporting Language for Originating VoIP PTSN Traffic |

This filing is submitted in compliance with the Federal Communication Commission Report and Order in WC Docket Nos. 10-90, etc., FCC Release Number 11-161 (Nov. 18, 2011) ("FCC ICC Order) and the FCC Second Order on Reconsideration (FCC 12-47), adopted April 24, 2012.

Pursuant to the FCC Orders, revisions required with this filing are scheduled to become effective on July 15, 2014.

If you have any questions or comments, please do not hesitate to contact me.

Sincerely,

Mark A. DiNunzio
Director, Regulatory Affairs
(623) 328-3252

ACCESS SERVICE

SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)

3.6 Obligations of the Customer

3.6.2 On-Hook and Off-Hook Supervision

The Customer's facilities shall provide the necessary on-hook and off-hook supervision for accurate timing of calls.

3.6.3 Identification and Rating of VoIP-PSTN Minutes of Use (MOUs)

1. Scope

This section governs the identification and rating of intrastate VoIP-PSTN MOUs.

VoIP-PSTN Traffic is defined as traffic exchanged between a Cox local subscriber and the customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format.

The rating of intrastate access MOUs (unless the parties have agreed otherwise) is compliant with the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov.18, 2011) ("FCC ICC Order") and the FCC Second Order on Reconsideration (FCC 12-47), adopted April 24, 2012.

2. Rating of VoIP-PSTN Traffic

In accordance with the FCC Orders this section establishes the originating and terminating rates for intrastate access MOUs.

The terminating rates are established as provided in Cox Communications Tariff FCC No. 4.

The originating rates are established as follows:

The originating rates for intrastate toll VoIP-PSTN MOUs identified in accordance with this tariff section are established as provided in Cox Communications Tariff FCC No. 4.

The originating rates for intrastate toll traffic other than VoIP-PSTN MOUs are compensated at the rates in 3.10 following.

3.6 Obligations of the Customer

3.6.3 Identification and Rating of VoIP-PSTN Minutes of Use (MOUs)

(N) (D)

3. PVU Factor

The customer will calculate and furnish to Cox a factor (the PVU-Customer or "PVU-C") representing the percentage of the total originating intrastate access MOUs received from a Cox local subscriber in Arizona that the customer terminated in IP format. The PVU-C shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

Cox will develop a factor (the PVU-Provider or "PVU-P") which shall be based on information reported by Cox on its most recent FCC Form 477.

The PVU-C will be used in conjunction with the PVU-P to calculate the PVU that will be used on the customer's account to allocate originating intrastate MOUs to be rated as originating intrastate toll VoIP-PSTN MOUs.

4. Determination of VoIP-PSTN Traffic

Cox will use the PVU-C and PVU-P factors to calculate an individual PVU factor that represents the percentage of total originating intrastate access MOUs exchanged between a Cox local subscriber and the customer either originated in IP format at Cox's end or terminated in IP format at the customer's end, or IP format at both ends. The individual originating PVU factor will be calculated as the sum of: (A) the PVU-C factor and (B) the PVU-P factor times (1.0 minus the PVU-C factor).

The PVU factor shall be used to determine the portion of originating intrastate MOUs exchanged between a Cox local subscriber and the customer to be rated as originating intrastate toll VoIP-PSTN MOUs.

5. PVU Defaults

If an originating PVU-C factor is not submitted by the customer the PVU shall be set equal to the percentage of VoIP subscribers in the most recently released Local Competition Report for the state or if a state report is not available, the percentage of VoIP subscribers for the United States until the information is received.

SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)

3.6 Obligations of the Customer

3.6.1 Identification and Rating of VoIP-PSTN Minutes of Use (MOUs)

(N) (D)

6. PVU Updates

The customer shall update its originating PVU-C to Cox each quarter, based on data from the preceding quarter. The originating PVU-C shall be submitted no later than the 15th day in the months of January, April, July, and October of each year. The updated quarterly originating PVU-C will be used in conjunction with Cox's most current PVU-P to calculate the updated PVU factor. No later than 30 days from receipt of the originating PVU-C, the new PVU will apply prospectively to the customer's next applicable bill cycle and serve as the basis for determining VoIP-PSTN MOUs until superseded by a new quarterly originating PVU-C.

The PVU-P factor shall be updated semi-annually when a new FCC Form 477 is released by Cox.

When the default PVU is set for a customer, the factor will be updated when the Local Competition Report is released which will be updated no later than 30 days from the semi-annual release of the new Local Competition Report. The updated PVU factor will apply prospectively to the customer's next applicable bill cycle and serve as the basis for determining VoIP-PSTN MOUs until superseded by a new PVU or until a quarterly originating PVU-C is submitted by the customer.

7. PVU Rebuttal

If the customer believes the PVU factor as determined in 4. 5. or 6. preceding, is incorrect, it may seek to revise the PVU factor by using the dispute process and/or by providing supporting documentation sufficient to establish the calculation of a new PVU. Any changes to the PVU factor pursuant to this process shall be effective as of the next billing cycle after the customer provides the data required for recalculation and Cox determines the customer's supporting documentation is sufficient to establish the calculation of a new PVU. The customer's previously billed MOUs may be adjusted retroactively for a period if mutually agreed as appropriate

ACCESS SERVICE

SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)

3.6 Obligations of the Customer

3.6.3 Identification and Rating of VoIP-PSTN Minutes of Use (MOUs)

8. PVU Verification

If the PVU is determined in accordance with 4., 5. and 6. preceding, not more than twice in any year Cox may ask the customer to verify the originating PVU-C factor furnished to Cox and the customer may ask Cox to verify the PVU-P factor and/or the calculation of the PVU factor. The party so requested shall comply, and shall reasonably provide the records and other information used to determine the respective originating PVU-C, PVU-P and PVU factors.

If the customer does not comply with a request from Cox for verification of the originating PVU-C factor and provide documentation deemed sufficient by Cox within thirty (30) days, the PVU shall be set equal to the percentage of VoIP subscribers in the most recently released Local Competition Report for the state or if a state report is not available the percentage of VoIP subscribers for the United States until such time as customer provides the information required.
