Advice No. 748

Arizona Corporation Commission  
ATTN: Docket Control  
1200 West Washington  
Phoenix, AZ 85007

Arizona Corporation Commission  
DOCKETED

OCT 23 2014

Re: AT&T Corp.  
Docket No. T-20872A-14-0375

Enclosed for filing with the Commission are an original and thirteen (13) copies of revisions to AT&T Corp.'s ("AT&T") Private Line Services Tariff – Schedule 9. The purpose of this filing is to remove intrastate T1 Enhanced Diversity Routing Option (EDRO) from all Private Line Interoffice Channel service publications since we have no more customers subscribing to this feature.

<u>Section</u>	<u>Page</u>	<u>Revision</u>

7. ACCUNET® T1.5 SERVICE-INTEROFFICE

7.1 SERVICE COMPONENTS (continued)

7.2.3 CHANNEL OPTIONS (continued)

C. CLEAR CHANNEL CAPABILITY

This option provides a Customer with the capability to transmit DSO (64 kbps) or DS1 (1.544 Mbps) signals with more than 15 consecutive zeros in a transmission. B8ZS (bipolar eight zero substitution) is the only coding technique acceptable for use with ACCUNET T1.5 Service to provide 64 kbps clear channel capability. B8ZS coding is described in Technical Publication-PUB 62411.

Compatible Customer Premises equipment is required with this option. This equipment must be capable of transmitting and receiving B8ZS coding and must conform to extended superframe format. Extended superframe format is described in Technical Publication-PUB 54016.

An order for the Clear Channel Capability option must be placed coincidentally with the Customer's order for an ACCUNET T1.5 IOC, though this option may not be available at all AT&T Central Offices. There is no charge for this option.
