Comments: I wish to ask the ACC to please not rise to the level of hysteria being fomented in Sedona on the matter of smart meters. These devices use the same frequencies as baby monitors, cell phones and wireless routers but are located outside the home and are in operation for milliseconds, not hours. If the opponents are opposed to smart meters why are they not campaigning for elimination of these devices particularly in public places. The allegations regarding collection of data are totally absurd. The only clinically conducted valid research studies in health effects have shown that those who claim to be sensitive to them cannot distinguish from them being on or off. The rest of us who want smart meters to provide timely usage data for accessing necessary electricity off the grid would like to see a high fee for opting out so that we can all have the benefits of this service and get on with some sanity rather than outrageous hyperbole. Please decide in favor of the good citizens of our community and sustain a \$30 monthly fee for opting out. Best regards Patricia Seeley
