Subject: Comment on: SW-01303A-09-0343

Dear Chairman Stump and Commissioners:

As the Commission proceeds with considering full consolidation of all five (5) of EPCOR's wastewater districts under the above subject case, an instant case for Mohave (WS-01303A-14-0010) for an increase in wastewater rates is in progress. If the Commission approves full consolidation under the subject case on or about year-end, it raises the following concerns:

- Should a new rate case be filed by EPCOR for all its wastewater districts to factor in the current Mohave case? If not,
- Will the Mohave case be withdrawn? If not, and their new rate increase is approved, will the increase be spread among all its wastewater districts?
- Will there be a moratorium be put in place before EPCOR can file for a new rate case to allow all ratepayers to adjust to the new wastewater consolidated rate (\$34 as proposed by EPCOR)?
- Other conflicts or interactions?

Bob Golembe
