ORIGINAL

ARIZONA CORPORATION COMMISSION  
DOCKET CONTROL

Dear Commissioners:

I own my home, recycle, and make conservative energy decisions whenever possible. I believe climate change is real and the heavy dependence on carbon based energy is something we should be working to remedy. I also would never install roof top solar panels, either as a purchase or a lease. Until now.

Maintenance, potential roof damage, and obsolescence are financial risks I am not willing to take. However, I would absolutely ask to be included in the APS roof top solar project. I take on no risk, the installation and any resulting damage is covered, and the reduction of carbon based energy is advanced.

There seems to be no down side for the public or the state in this request. Please approve this project.

Respectfully,

Brian O'Malley
