Docket # E-00000XX-13-0214

Dear Chairman Stump and Commissioners:

Efficiency First Arizona (EFAZ) is a 501c6 non-profit trade organization that represents companies which are a vital part of a robust and growing energy efficiency industry in Arizona. We work with the utility companies you regulate to provide the "nuts and bolts" of efficiency upgrades to homes, businesses, churches, and public buildings across our state. We are proud of the high quality services that we deliver and the skilled jobs that we create in our communities.

We want to thank the Commission for its efforts to advance energy efficiency. We see first-hand every day that Arizonans value the energy efficiency policies and programs that you have approved. From installing new lighting in schools to adding new insulation in homes, we have worked with thousands of residents and businesses across the state. These consumers and businesses are grateful for buildings and homes that are more comfortable, healthier, and less expensive to operate thanks to your work including the adoption and implementation of the Electric Energy Efficiency Standard.

We urge the members of the Arizona Corporation Commission to continue to support existing energy efficiency programs and policies like the Electric Energy Efficiency Standard. This Standard provides the foundation for the energy-saving programs upon which Arizona consumers and our businesses rely. We similarly urge you to oppose any rollbacks or revisions to the Standard that would undermine the great benefits and utility bill savings that energy efficiency programs deliver.

Please continue the momentum that the existing Standard has established.

Sincerely,

Efficiency First Arizona – Board of Directors and Founding Members

Arizona Corporation Commission
