AZ CORP COMMISSION
DOCKET CONTROL

ORIGINAL

Dear members of the Commission:

I own a small business in Arizona, and being able to run it has been one of my most rewarding experiences.

However, in order to attract customers during this scorching part of the year, an AC is necessary; there is no doubt about it. But keeping my business cool is getting more and more expensive, and my utility costs are simply cutting too far into my profits.

Several of my friends also run small businesses, and I know that they have been struggling with this, as well. We need a solution, and we need one fast.

I recently heard of the Energy Efficiency Standard, and I believe that its implementation will really provide a financial boost for small business owners, particularly those who take advantage of energy efficiency programs offered by their utility. Essentially, it seems like exactly what we need. I truly hope that you will implement this standard as it was intended -now.

Best,

Christina Norris
