*Docket E-00000xx-13-0214*

Dear Chair Stump and the Corporation Commission,

Energy efficiency represents a significant largely untapped opportunity for meeting the dual goals of financial return and environmental protection. By eliminating wasted energy, the U.S. can reduce its fossil fuel use, move toward energy independence, and reduce its greenhouse gas (GHG) emissions by almost forty percent by 2030 at a net savings to customers.

That's why it's crucial that you enforce and embolden the energy efficiency standard for APS. Not only is it the right thing to do, but it will decrease costs for my business, increasing the value I can supply to Arizona.

Sincerely,

Jeff Thorsett  
Proprietor/Brewmaster
