AZ CORP COMMISSION
DOCKET CONTROL

Dear members of the Arizona Corporation Commission,

I am a small business owner in Arizona, and I think that being energy efficient is very important.

With high temperatures in the summer, keeping my shop cool becomes increasingly expensive. Energy efficiency can help reduce monthly energy bills, while also reducing air pollution and negative public health impacts, such as asthma that coal-fired power plants contribute to.

I urge you to allow the energy efficiency standard to continue to exist as it was intended.

With Regards,
