

Docket E-000000XX-13-0214

0000157995

11/11/14

Dear Chairman and Commissioners,

I have been a customer of Tucson Electric Power and Southwest Gas since 1984. I am pleased with the savings the energy efficiency standards have given me and also the saving of the environment that lower use of energy has brought about.

So I urge you all to oppose any reopening or revision to the efficiency standards. I know our efficiency makes Arizona an attractive place to live and a great place to establish a new business or continue to grow an old one.

Thank you for your consideration.

Sincerely,
Margaret Lawrence
