Re: Docket No. E-00000XX-13-0214

DOCKETED BY 

Dear Chairman Stump and Commissioners,

I am writing you today to oppose the proposed changes to the Electric Energy Efficiency Standard and Natural Gas Energy Efficiency Standard.

The current standard has paid significant dividends to Arizona's ratepayers, and should be retained. As a long-time customer of Tucson Electric Power and energy industry professional, I have seen the benefits of this policy first-hand.

Programs such as TEP's Energy Smart Homes, Trees for Tucson, and Efficient Homes Program provide real benefit for consumers of diverse economic and geographic backgrounds, while also saving the ratepayer the cost of building new generation capacity.

The EE standard also creates local jobs to put Arizonans to work. These jobs can't be outsourced to other countries or states, and help stem the tide of billions of dollars sent outside Arizona each year to pay for energy.

Let's continue Arizona's leadership in energy efficiency, and make Arizona a better state for future generations! Please continue support the Energy Efficiency Standards adopted in 2010.

Regards,

Louis Woofenden
