Docket E-00000XX-13-0214

Dear Corporation Commissioners,

I am an APS customer and a participant in the APS Home Energy Checkup program. This program and the available energy efficiency rebates have allowed me to have affordable access to energy efficiency improvements on my home that I might not have been able to pursue without the rebates. My home energy costs are now a fraction of what they were before the improvements made to my home after the home energy check up program which found numerous issues which could be remedied. These improvements were all made possible by the rebates and cost savings from the energy efficiency rebate. As a rate payer I would like to encourage you to support the Energy Efficiency Standard that has been instrumental to creating and implementing these energy efficiency programs. Ending these programs would have a detrimental affect to our states sustainable future, job growth and energy independence. Please keep these valuable programs around for future rate payers like myself and help the world be greener- leaving our kids an earth that is in better shape for sustaining life, long term.

Sincerely,  
Charisse Oveson  
Flagstaff, AZ
