AZ CORP COMMISSION
DOCKET CONTROL

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Rossi Azenov

Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents. ((DESCRIBE YOUR YEARS AND DATES OF SERVICE))

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

P.S. Commissioner Burns, My wife Pam and I moved to Verrado August 16th 2014. We had heard the water cost were high. We were so surprised and quite frankly appalled to see just how high the bills were! There is such a difference across the five Epcor districts that the reasoning is hard to comprehend let alone understand. We hope with your help we can resolve these unfair costs and come up with a reasonable solution. Thank You W Deja

The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all of the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Larry Noble

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

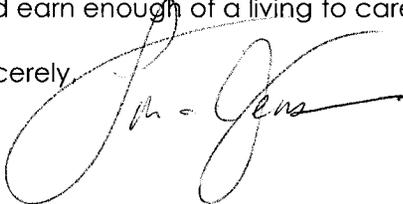

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents. I'm a Vietnam War Veteran having served from 1961 - 1965 in the United States Air Force, 92nd Combat Support Squadron guarding B-52 and KC-135 Tankers while on alert status in conjunction with our effort in Viet Nam. I understand the commitment all of us made, including yourself, to this great country of ours.

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

Kenyon A. Spencer

*Follow up, I'm for any support you can provide our
parents here in Verrado. \$1200 for my total water & waste
bill is far too much for just my wife and I. I know
you understand.*

W-01303A-09-0343

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached 50 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michael C. Harris

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Andrew R. McGrew

Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Margie Newman

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

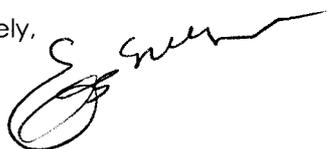

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached 40 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michael C. Harris

Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents.

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents.

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

William Schmidt

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached 40 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michael C. Harris

Subject: ACC dockets: SW-01303A-09-0343
W-01303A-09-0343

Commissioner Pierce,

As a resident of Verrado, I respectfully urge you to cast your vote in favor of full consolidation of EPCOR's wastewater districts. I know that, in the previous round with EPCOR, you voted in favor of deconsolidating the Anthem and Agua Fria wastewater districts, and sincerely hope you will apply a critical eye to the circumstances that have been created as a result.

Recently, the Residential Utilities Consumer Office recommended that the ACC take a step back and delay taking action until a full rate case study is conducted. I urge you to reject this. We find ourselves in an exceptional circumstance, and exceptional measures are necessary to set things right. Additional delays and the expense of conducting a new study will only serve to inflict further damage on customers who are already burdened with some of the highest wastewater rates in the nation, let alone Arizona.

The Arizona Constitution is clear on this issue. Section 12 of Article 15, which charters and governs the ACC, states "no discrimination in charges, service, or facilities shall be made between persons or places for rendering a like and contemporaneous service". Though the path to this point has been long and convoluted, there can be no doubt that EPCOR's wastewater district and pricing structure is the exact condition the Constitution sought to prevent. As we find ourselves in direct violation of this principle, swift and decisive action to set things right is the only appropriate course.

Residents in Agua Fria are hurting. \$121 each month for wastewater alone (as the rate is set to increase in January) is unreasonable and untenable. Full consolidation is good policy and the most efficient way to deliver service and absorb costs for all EPCOR wastewater customers.

Please don't allow this debate to be swayed by self-interested and short-sighted parties. We need this relief today. Please cast your vote for good policy, for FULL CONSOLIDATION OF ALL OF EPCOR'S WASTEWATER DISTRICTS.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Dear Sir;

As a resident of the Agua Fria wastewater district, managed by EPCOR, I am writing to urgently request that you revise your position to the ACC and allow a rapid vote for full consolidation of EPCOR wastewater districts. I further urge you to consider the spirit of RUCO's charter under the Arizona Revised Statutes "to represent the interests of residential utility customers" as you continue intervene on our behalf.

As you know, Agua Fria ratepayers have borne the brunt of the 2012 deconsolidation decision. Our wastewater rates stand at \$106 per customer per month, and those rates will rise to \$121 in January. This rate is over 400% of the average metro Phoenix wastewater customer rate nearly the highest in the nation. Yet RUCO's response to EPCOR's proposal to consolidate seems to indicate a greater interest in procedural and technical correctness above the incredible circumstances in which we, the ratepayers, find ourselves.

The wastewater district structure has pitted neighborhoods against each other, each advocating for whatever will provide them the greatest short-term savings, without regard to what is the best and most efficient way to provide an essential service to the entire community. This is precisely why Section 12 of Article 15 of the Arizona Constitution specifies, "no discrimination in charges, service, or facilities shall be made between persons or places for rendering a like and contemporaneous service".

I understand RUCO's concern that EPCOR appears to be out of compliance with a previous order to provide a system-wide rate case on which to base analysis, but it must not be the ratepayers who are made to suffer for it. I believe that RUCO can champion an elegant and comprehensive solution which combines specified intermediate rate-relief steps with a date-certain path to full consolidation, based on current and complete rate data. This would restore the constitutionality of the system and end incentives for self-serving inter-community bickering.

Agua Fria needs a solution now. I respectfully request you place resident needs at the forefront and do everything you can to support ultimate full consolidation of EPCOR wastewater districts, even if it involves a multi-phased order.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

W-01303A-09-0343

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached 40 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michael C. Harris

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

David Katz

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents. I was enlisted in the US Navy from 1982 – 1990 and proudly served aboard the USS Florida nuclear submarine.

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created ONE HELL OF A MESS and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

Peter A. McSparran

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents. ((DESCRIBE YOUR YEARS AND DATES OF SERVICE,))

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

cc: [unreadable]

Commissioner Burns;

Please accept this cover letter and the attached 40 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michael C. Harris

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Dear Sir;

As a resident of the Agua Fria wastewater district, managed by EPCOR, I am writing to urgently request that you revise your position to the ACC and allow a rapid vote for full consolidation of EPCOR wastewater districts. I further urge you to consider the spirit of RUCO's charter under the Arizona Revised Statutes "to represent the interests of residential utility customers" as you continue intervene on our behalf.

As you know, Agua Fria ratepayers have borne the brunt of the 2012 deconsolidation decision. Our wastewater rates stand at \$106 per customer per month, and those rates will rise to \$121 in January. This rate is over 400% of the average metro Phoenix wastewater customer rate nearly the highest in the nation. Yet RUCO's response to EPCOR's proposal to consolidate seems to indicate a greater interest in procedural and technical correctness above the incredible circumstances in which we, the ratepayers, find ourselves.

The wastewater district structure has pitted neighborhoods against each other, each advocating for whatever will provide them the greatest short-term savings, without regard to what is the best and most efficient way to provide an essential service to the entire community. This is precisely why Section 12 of Article 15 of the Arizona Constitution specifies, "no discrimination in charges, service, or facilities shall be made between persons or places for rendering a like and contemporaneous service".

I understand RUCO's concern that EPCOR appears to be out of compliance with a previous order to provide a system-wide rate case on which to base analysis, but it must not be the ratepayers who are made to suffer for it. I believe that RUCO can champion an elegant and comprehensive solution which combines specified intermediate rate-relief steps with a date-certain path to full consolidation, based on current and complete rate data. This would restore the constitutionality of the system and end incentives for self-serving inter-community bickering.

Agua Fria needs a solution now. I respectfully request you place resident needs at the forefront and do everything you can to support ultimate full consolidation of EPCOR wastewater districts, even if it involves a multi-phased order.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached 40 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michael C. Harris

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Fred R Abrego

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Barbara Lee Renta

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

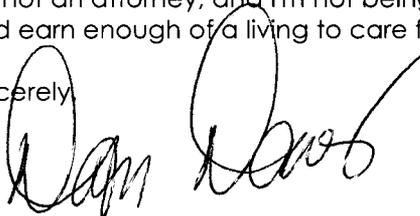

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached signed form letters from military veterans living in Verrado requesting your vote in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the mailing or email address above.

On behalf of the **Veterans Association of Verrado,**

Sincerely,

A handwritten signature in cursive script that reads "George J. Cannelos".

Commissioner Burns,

I am a resident of Verrado in the Agua Fria district and am appealing to you as a fellow veteran for your support in finding rate relief for our residents.

As former military members, we share a sense of service to a greater cause and a set of core values. These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

WWII PARATROOPER

These values shape our actions to take the right path, the path that accomplishes the mission, regardless of the challenges. The five-district wastewater model under EPCOR has created a mess and a crisis, and it will take a person of honor and courage to take steps to rectify it. I am looking to you for your leadership.

Agua Fria residents are a minority, compared to other districts, but we bear a cost burden unlike any other ratepayer in Arizona. \$121 in wastewater charges is an amount better used for food on the table, gas in the tank, or any number of other necessities.

As a Sailor, you took an oath to uphold the Constitution. As a candidate, you promised your decisions would be based on what you "believe will be of the greatest benefit to the rate paying customers of the utilities and the overall economic health of the state of Arizona". As an elected public servant, I assume you take this promise no less seriously than your Oath of Enlistment.

I respectfully, but urgently ask for your support in this issue and submit your vote in favor of FULL CONSOLIDATION of EPCOR's wastewater districts.

Sincerely,

Dean Marshall

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

Commissioner Burns;

Please accept this cover letter and the attached signed form letters from military veterans living in Verrado requesting your vote in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the mailing or email address above.

On behalf of the **Veterans Association of Verrado**,

Sincerely,

A handwritten signature in black ink, appearing to read "Michael C. Harris", with a long, sweeping underline.
