Docket # E-00000XX-13-0214

Dear Corporation Commissioners,

I am an APS customer and a participant in the APS Home Energy Checkup program. This program and the available energy efficiency rebates have allowed me to have affordable access to energy efficiency improvements on my home that I might not have been able to pursue without the rebates. I had an energy audit and followed through with the energy upgrades, which increased the energy efficiency of my small home in Flagstaff. I also manage eight other family-owned downtown Flagstaff homes. With my new knowledge of this program and its benefits and rebates I plan to conduct energy audits and upgrades to those older homes as well.

As a rate payer for a total of nine Flagstaff homes, I would like to encourage you to support the Energy Efficiency Standard that has been instrumental to creating and implementing these energy efficiency programs. Ending these programs would have a detrimental affect to our states sustainable future, job growth and energy independence. Please keep these valuable programs around for future rate payers like myself.

Sincerely,

Constance M. Taylor, PhD  
Flagstaff, AZ 86001
