Re: Docket No. E-00000XX-13-0214

ORIGINAL

Dear Chairman and Commissioners,

I write you to urge you to oppose the elimination of Arizona's Energy Efficiency Standards and any reopening of Arizona's Energy Efficiency Rules. These Standards are working to lower utility bills for me and my neighbors, protect vulnerable community members with weatherization and bill assistance, and make Arizona an affordable place to live and work.

I moved to Arizona from New York almost a year ago, and have grown to appreciate the beauty and potential Arizona holds as one of the fastest developing, diverse, and unique states of the U.S. To help make Arizona a state that both attracts and retains diverse individuals and economic development, I ask you to continue Arizona's success in energy efficiency programs that have helped save Arizona consumers and businesses over 540 million in three years. Upholding the Energy Efficiency Standards can create local jobs, rein in costs, and prevent future spikes in utility bills. As a state with 115 degree summers and chilly winters, these standards help cut energy waste while conserving energy costs in the interests of all Arizonans.

Energy Efficiency Standards have helped provide bill assistance for thousands of families facing hardship as Arizona struggles to recover from the Great Recession, and has supported the pursuit of happiness, security, and self-sufficiency.

I am confident you will do the right thing for Arizona and our state's economy. Please continue to support the bipartisan Energy Efficiency Standards adopted in 2010 and make Arizona the state that we want.

Thank you,

Amanda Lee
