Comments: EMFs & Dirty Electricity - INVISIBLE THREAT The Link Between Wireless Radiation and a Host of Serious Illnesses EXCERPTS by Frank Clegg <http://vitalitymagazine.com/article/invisible-threat/> The longtime president of Microsoft Canada is now our country's leading advocate for wireless radiation safety. Frank Clegg, now CEO of the new non-profit organization, Canadians for Safe Technology. Since I helped found Canadians For Safe Technology ([www.C4ST.org](http://www.C4ST.org)), I have personally met too many people who are suffering from over-exposure to wireless radiation. Cancer isn't the only risk. Electrosensitivity is not like an allergy you are born with; it is an illness that builds up over increased time and radiation exposure. With more and more cell towers and smart meters crowding into our living spaces, with Wi-Fi in buses, schools, trains, offices and hotels, people who are sensitive now struggle to work, travel and support their families. In Sweden electrosensitivity is an officially recognized impairment. The U.S. and Health Canada are dangerously behind other countries in

recognizing electrosensitivity. It is disturbing to note that Health Canada historically did recognize that some people get sick from microwave radiation. But in the last "update" of the Safety Code in 2009, the only significant change was to delete the single sentence that read: "Certain members of the general public may be more susceptible to harm from RF and microwave exposure." This acknowledgement that some people are susceptible to harm from wireless radiation had been part of the safety code for more than a decade. It vanished about the same time Wi-Fi was rolled out into all schools and offices. In 2012, the Austrian Medical Association also adopted guidelines for the diagnosis and treatment of illness caused by wireless radiation. (8) Austria's checklist for physicians lists the following symptoms: sleep problems, fatigue, exhaustion, lack of energy, restlessness, heart palpitations, blood pressure problems, muscle and joint pain, headaches, depression, difficulty concentrating, forgetfulness, anxiety, urinary urgency, anomia (difficulty finding words), dizziness, tinnitus and sensations of pressure in the head and the ears, tightness in chest, hyperactivity, irritability, noise sensitivity, burning sensation in the eyes and skin conditions. Frank Clegg encourages everyone who is reading this with unexplained chronic health problems - including disturbed sleep - to turn off every wireless device in their home for a week. Write down what happens. In the U.S., the spokesman for the wireless industry association, Dane Snowden, is on record as testifying to the State Legislature of Vermont: "Industry has not said once - not once - that cell phones are safe. The federal government .has said it is safe." Our lax federal guideline needs to be rigorously updated. Vocally and repeatedly demand a safer wireless policy from any candidate you would like to endorse. If they refuse, find a candidate who will step up. The link below is C4ST's advice on how to keep your family safe. They are calling for changes to Canada's outdated regulations.

[Http://c4st.org/images/documents/C4STOnePager.pdf](http://c4st.org/images/documents/C4STOnePager.pdf) WE SHOULD ALSO DO THIS IN THE UNITED STATES.
