RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

To Whom it May Concern;

Please accept this cover letter and the attached 40 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michelle Harris

Dear Commissioner Bitter Smith,

As a Verrado resident, I am writing to respectfully urge you to cast your vote in favor of Full Consolidation of wastewater districts under EPCOR management. Your thoughtful leadership is sorely needed at this critical juncture for the Commission.

As you recently cited before NARUC, the question of consolidation of smaller water and wastewater districts has been on the table in some form or another for at least fifteen years. The benefits over the long term are well documented, but short-term interests have always seemed to stall the process. As a result, the problem has finally escalated to a point of such a disparity among EPCOR wastewater customers that previous concerns no longer seem credible.

The debate always seems to hinge on cost-cause principles versus level-rate principles. But you know that these concepts are much clearer on paper than in the real world, and that any version of cost-cause allocation introduces its own element of unfairness. Today's EPCOR rate models are, quite possibly, the worst versions of both. The Commission should also remember that customers aren't the only cause of cost; unwieldy rate structures, infrastructures, and endless bureaucratic processes are equally, if not more demanding.

The situation we all find ourselves in is patently ludicrous. Five districts, representing at least a dozen communities, in addition to ACC staff and RUCO, are all promoting variations on three (in fact, four) proposals before the Commission. Meanwhile, the issue which reopened this case earlier this year seems to be pushed farther and farther from the center of attention: that Agua Fria customers are paying some of the highest rates in the nation through no fault or indiscretion on their parts.

The Commission is actually in an enviable position. We are in unprecedented territory with regards to private water/wastewater providers in Arizona. And, no matter which decision is made, a segment of the population will be unhappy. So the question is no longer whom to please, but rather which policy decision will put Arizona on a path to achieving the right balance between affordable rates, reliable service, and a healthy company that can support growth going forward. Please be that voice to drive us forward. Please vote for full consolidation.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

But you know that these concepts are much clearer on paper than in the real world, and that any version of cost-cause allocation introduces its own element of unfairness. Today's EPCOR rate models are, quite possibly, the worst versions of both. The Commission should also remember that customers aren't the only cause of cost; unwieldy rate structures, infrastructures, and endless bureaucratic processes are equally, if not more demanding.

The situation we all find ourselves in is patently ludicrous. Five districts, representing at least a dozen communities, in addition to ACC staff and RUCO, are all promoting variations on three (in fact, four) proposals before the Commission. Meanwhile, the issue which reopened this case earlier this year seems to be pushed farther and farther from the center of attention: that Agua Fria customers are paying some of the highest rates in the nation through no fault or indiscretion on their parts.

The Commission is actually in an enviable position. We are in unprecedented territory with regards to private water/wastewater providers in Arizona. And, no matter which decision is made, a segment of the population will be unhappy. So the question is no longer whom to please, but rather which policy decision will put Arizona on a path to achieving the right balance between affordable rates, reliable service, and a healthy company that can support growth going forward. Please be that voice to drive us forward. Please vote for full consolidation.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Dear Commissioner Bitter Smith,

As a Verrado resident, I am writing to respectfully urge you to cast your vote in favor of Full Consolidation of wastewater districts under EPCOR management. Your thoughtful leadership is sorely needed at this critical juncture for the Commission.

As you recently cited before NARUC, the question of consolidation of smaller water and wastewater districts has been on the table in some form or another for at least fifteen years. The benefits over the long term are well documented, but short-term interests have always seemed to stall the process. As a result, the problem has finally escalated to a point of such a disparity among EPCOR wastewater customers that previous concerns no longer seem credible.

The debate always seems to hinge on cost-cause principles versus level-rate principles. But you know that these concepts are much clearer on paper than in the real world, and that any version of cost-cause allocation introduces its own element of unfairness. Today's EPCOR rate models are, quite possibly, the worst versions of both. The Commission should also remember that customers aren't the only cause of cost; unwieldy rate structures, infrastructures, and endless bureaucratic processes are equally, if not more demanding.

The Commission is actually in an enviable position. We are in unprecedented territory with regards to private water/wastewater providers in Arizona. And, no matter which decision is made, a segment of the population will be unhappy. So the question is no longer whom to please, but rather which policy decision will put Arizona on a path to achieving the right balance between affordable rates, reliable service, and a healthy company that can support growth going forward. Please be that voice to drive us forward. Please vote for full consolidation.

Dear Commissioner Bitter Smith,

As a Verrado resident, I am writing to respectfully urge you to cast your vote in favor of Full Consolidation of wastewater districts under EPCOR management. Your thoughtful leadership is sorely needed at this critical juncture for the Commission.

As you recently cited before NARUC, the question of consolidation of smaller water and wastewater districts has been on the table in some form or another for at least fifteen years. The benefits over the long term are well documented, but short-term interests have always seemed to stall the process. As a result, the problem has finally escalated to a point of such a disparity among EPCOR wastewater customers that previous concerns no longer seem credible.

The debate always seems to hinge on cost-cause principles versus level-rate principles. But you know that these concepts are much clearer on paper than in the real world, and that any version of cost-cause allocation introduces its own element of unfairness. Today's EPCOR rate models are, quite possibly, the worst versions of both. The Commission should also remember that customers aren't the only cause of cost; unwieldy rate structures, infrastructures, and endless bureaucratic processes are equally, if not more demanding.

The situation we all find ourselves in is patently ludicrous. Five districts, representing at least a dozen communities, in addition to ACC staff and RUCO, are all promoting variations on three (in fact, four) proposals before the Commission. Meanwhile, the issue which reopened this case earlier this year seems to be pushed farther and farther from the center of attention: that Agua Fria customers are paying some of the highest rates in the nation through no fault or indiscretion on their parts.

The Commission is actually in an enviable position. We are in unprecedented territory with regards to private water/wastewater providers in Arizona. And, no matter which decision is made, a segment of the population will be unhappy. So the question is no longer whom to please, but rather which policy decision will put Arizona on a path to achieving the right balance between affordable rates, reliable service, and a healthy company that can support growth going forward. W-01303A-09-0343

Dear Commissioner Bitter Smith,

As a Verrado resident, I am writing to respectfully urge you to cast your vote in favor of Full Consolidation of wastewater districts under EPCOR management. Your thoughtful leadership is sorely needed at this critical juncture for the Commission.

As you recently cited before NARUC, the question of consolidation of smaller water and wastewater districts has been on the table in some form or another for at least fifteen years. The benefits over the long term are well documented, but short-term interests have always seemed to stall the process. As a result, the problem has finally escalated to a point of such a disparity among EPCOR wastewater customers that previous concerns no longer seem credible.

The debate always seems to hinge on cost-cause principles versus level-rate principles. But you know that these concepts are much clearer on paper than in the real world, and that any version of cost-cause allocation introduces its own element of unfairness. Today's EPCOR rate models are, quite possibly, the worst versions of both. The Commission should also remember that customers aren't the only cause of cost; unwieldy rate structures, infrastructures, and endless bureaucratic processes are equally, if not more demanding.

The situation we all find ourselves in is patently ludicrous. Five districts, representing at least a dozen communities, in addition to ACC staff and RUCO, are all promoting variations on three (in fact, four) proposals before the Commission. Meanwhile, the issue which reopened this case earlier this year seems to be pushed farther and farther from the center of attention: that Agua Fria customers are paying some of the highest rates in the nation through no fault or indiscretion on their parts.

The Commission is actually in an enviable position. We are in unprecedented territory with regards to private water/wastewater providers in Arizona. And, no matter which decision is made, a segment of the population will be unhappy. So the question is no longer whom to please, but rather which policy decision will put Arizona on a path to achieving the right balance between affordable rates, reliable service, and a healthy company that can support growth going forward. Please be that voice to drive us forward. Please vote for full consolidation.

Sincerely,

Michelle Harris

RE: Docket # SW-01303A-09-0343 – EPCOR Wastewater
W-01303A-09-0343

To Whom it May Concern;

Please accept this cover letter and the attached 15 signed form letters from Verrado residents, individual voters, making a strong case in favor of full consolidation of wastewater districts under EPCOR's management. We respectfully request you consider these sentiments and accept these letters be included as part of the docket record, expressing resident support for this issue.

Thank you for your time and assistance with this matter. If you have any questions, please contact me at the email address above or by phone at (402) 957-6387.

On behalf of Verrado Residents,

Sincerely,

Michelle Harris

Dear Commissioner Bitter Smith,

As a Verrado resident, I am writing to respectfully urge you to cast your vote in favor of Full Consolidation of wastewater districts under EPCOR management. Your thoughtful leadership is sorely needed at this critical juncture for the Commission.

As you recently cited before NARUC, the question of consolidation of smaller water and wastewater districts has been on the table in some form or another for at least fifteen years. The benefits over the long term are well documented, but short-term interests have always seemed to stall the process. As a result, the problem has finally escalated to a point of such a disparity among EPCOR wastewater customers that previous concerns no longer seem credible.

The debate always seems to hinge on cost-cause principles versus level-rate principles. But you know that these concepts are much clearer on paper than in the real world, and that any version of cost-cause allocation introduces its own element of unfairness. Today's EPCOR rate models are, quite possibly, the worst versions of both. The Commission should also remember that customers aren't the only cause of cost; unwieldy rate structures, infrastructures, and endless bureaucratic processes are equally, if not more demanding.

The situation we all find ourselves in is patently ludicrous. Five districts, representing at least a dozen communities, in addition to ACC staff and RUCO, are all promoting variations on three (in fact, four) proposals before the Commission. Meanwhile, the issue which reopened this case earlier this year seems to be pushed farther and farther from the center of attention: that Agua Fria customers are paying some of the highest rates in the nation through no fault or indiscretion on their parts.

The Commission is actually in an enviable position. We are in unprecedented territory with regards to private water/wastewater providers in Arizona. And, no matter which decision is made, a segment of the population will be unhappy. So the question is no longer whom to please, but rather which policy decision will put Arizona on a path to achieving the right balance between affordable rates, reliable service, and a healthy company that can support growth going forward. Please be that voice to drive us forward. Please vote for full consolidation.

Sincerely,

Support the Full Consolidation of EPCOR Wastewater Districts

Water Action Committee
