**Subject:** Powerline on Cactus Rd in Surprise

Dear Mr. Froetscher,

I have been a APS customer since 2012 when we bought our beautiful home. We had been looking at this home (floor plan) for 10 years, and finally we were able to buy it. We were planning on this to be the last home we bought. We are two miles from two of our boys, and grand kids.

I was driving home the other night and, I was at the west end of Cactus. I just sat there and looked down the street. It looked like APS highway have power lines on both sides of the road. It is actually kinda of scary to look at. We completely understand the need for the power poles. We are not asking for any thing other than you to move them to the south side of Cactus. When I drive down the 303 and see these pole you are not going in a straight line.

My neighbor that live 2 doors down from me is fighting cancer with all her strength that she has, and how is going to affect her? None of us know. The kids that stand under the lines waiting for the bus? I know that we are a small group of people that really don't matter in the APS world, because you have a time line that you have to meet. We are a small group of people that love our community. All we ask is that you gives us a little something in your big world and, move the power lines to the south side of cactus.

Thank you for taking the time to read this.

Hugh and Kim Jones  
17639 W Chater Oak Rd

**Subject:** Leukemia and Power-Lines Study

Dear Commissioners,

Re: Sarah Ann Ranch Community versus APS 230KV Power Lines:

I know that you have recently received many email letters from our concerned residents regarding the installation of these high power-lines that will rip through our greenbelt. If you wonder why we are so concerned I would encourage you to access the following link and read about a study that was conducted in the United Kingdom .

Copy and paste this link to read about children, leukemia and power lines. <http://www.bcmj.org/.../living-near-power-lines-bad-our...> Note: 60 meters = 196.85 ft. This study showed an elevated risk of leukemia among children living in homes with distances much greater than 60 m from high voltage power lines. This study involved close to 30,000 matched case-control pairs of children living in the United Kingdom. It was found that children living in homes as far as 600 m from power lines had an elevated risk of leukemia. An increased risk of 69% for leukemia was found for children living within 200 m of power lines while an increased risk of 23% was found for children living within 200 to 600 m of the lines. This study was notable in that it found some elevation of risk at much greater distances than previous studies.

In one Swiss study it supported the hypothesis that magnetic field exposure plays a role in the etiology of Alzheimer's disease and senile dementia at 50 m (that's just over 164 ft). Since some of our homes are between the 170 -220 ft from these darn lines it can only help to move them. The further the better.

If any of you feel you don't have the time or want to take the time to read and study more about the health problems these lines can create for human beings then perhaps you shouldn't be on the board.

Most Sincerely,  
Darlene Davis  
Sarah Ann Ranch Concerned Resident

**Subject:** APS high-voltage power lines

Dear Mr. Froetscher:

We have been Surprise residents since Spring of 2013 and have found the Sarah Ann Ranch community to be lovely. Now, it is with very great concern that we have learned about the APS high-voltage power lines to be erected on West Cactus Road in our HOA area.

- Due to this project, we are very worried about the health of our residents and that of future generations here, significant property value declines and a lessened ability to sell our home when necessary, the unsightly appearance of the poles - which are so very humongous - and any potential harm to the very environment we are all trying so hard to respect and to save in all its beauty.
- While we certainly acknowledge that power must continue to expand in our growing city of Surprise and beyond, we also are hopeful that at the least, an alternate area or alternate solution can be found. APS ethically should want to do the best for AZ citizens.
- Respectfully, we do hope that you will reconsider the plan now in place and give US also the respect we deserve as hard-working entities who hope to stay physically well and who also hope to secure the substantial investment we have placed in our homes and futures.

Thank you.

Sincerely,

Patricia (Pat) Krueger

**Subject:** Aps lines in Sarah Ann Ranch

Mr Froetscher,

I am an APS customer, and have been since I moved to Surprise, AZ in 2007. I'm directly involved with your companies powerlines being installed along catcus along the Sarah Ann Ranch Community. As you can see, I work, and live in the community I love and live in.

I must say I'm shocked at the speed in which these poles started to go up, and the urgency in which this is happening; given after being made aware of these massive poles recently. I did some research on the subject and it stated the construction should had began in 2008.

I purchsed my dream home in which I would raise my three children, and many years to accommodate a growing family with grandchildren and great grandchildren in 2007, I was the third purchaser thru D.R. Horton Deitz Crane series and in NO way shape or form did the sale rep or escrow reps. alert us of these massive electrical poles going up. I also purchased thru a realtor outside of the D.R. Horton sales representative and she and her company knew nothing about it as well.

I'm concerned of a few things. First, my families health. I live two streets in from where these proposed poles are going in, and all three of my children will be waiting for their school bus five days a week under these lines. Included is my daughter who is a type one diabetic. Alexis wears a pump that can not even go thru an x-ray machine, or near a magnet, as it will make her pump malfunction and not deliver her life saving insulin she receives every hour; will be under these high voltage lines? We are scared for her life and well being! Being that you must cut down trees because the electrical current KILLS the fruit on the trees!!!! What is it going to do to my daughters pump, that is to sensitive to even be around x ray and magnets?!

Second, after many researches done on my own there are so many red flags and questionable things that have popped up..... Making this feel very deceiving, and intentionally hidden so deep, no home owner with a non electrical knowledge would have ever known what it meant; as well as, it not even being written in an area among other electrical information, or other noise or danger in the area. (reading it even now, it is so confusing.. As if I'm reading a foreign language.) As of today; from back in 2003 and after 2008 the surprise website had a FULL development plan on what the city was to look like when all was finished; and it did not include these APS lines.... You can go and look at the zoning maps, the subdivision maps etc... It was even approved for Sarah Ann Ranch development with an entire double barrier of citrus trees that was written and approved in 2003 that is many years prior to azcc granting easement, which concerns me on the idea that there was not a community here..... ( there wasn't I know,) but the development plans, maps, zoning, and grading was already complete and in motion five years before this easement grant, so the azcc would have know about that!!! Why would D.R. Horton spend hundreds of thousands of dollars planting a double barrier of citrus tress, just to have them removed? Also, the only differance in housing from 2007 to now IS our community.... The other homes around us have been near completion for a long time; excluding the third phase of surprise loop farms 5 miles north of us, and the 303 expansion; which we knew about and saw the plans for! On the APS 10 yr plan for our area shows construction should have started in 2008 and a completion date by 2010.....and in no way showed/ or acknowledged them being installed on the north side of catcus or at all. It is still available online. Was APS

under a stipulation that the community had to be 95% completed and occupied, then stealthily install these unknown of poles so quickly right before your easement expired? And not prior so others could have purchased knowingly about this! I find it extremely odd that over 1000 people knew NOTHING about this including aps employees and surprise city employees that are our neighbors!

I do not understand why these poles didn't cross to the canal from the industrial area of the 303/beathany home? I get it is to late now for that, and I understand how important these poles are, and that your company is doing a job (although shameful for not fully disclosing, no notices ( a small sign no bigger than an 8x5 on an untraveled road is NOT sufficient or so deceptively hidden in a book, that we signed receipt for), nothing for 6 years of me living in this home) but it is NOT to late to make 965 of your paying customers feel like their family, health, investment, hard earned money, and community matter! It's all about representing the brand and following suit with their mission statement.. I would ask you to think what you would want if this directly affected your family? We ask as a community to lessen this interruption of life to us, just south of catcus. This small inconvenience for your multi billion dollar company would speak volumes to our community, that states "we matter, and APS does care about even one of it's clients." Because as of right now, we have been lied to by many and most devastating is those told to us by APS.

Let me reiterate how many people are involved in this lie and manipulation, just to gain capital for their own gratification. This hidden agenda is putting numerous lives, including children in jeopardy. It's very fraudulent and completely disrespectful to treat our family like our wellbeing doesn't matter to the companies involved!

Thank you for your time, and I hope we can make this the best solution for all.

**Subject:** Update on the lawyer and Pleadings for Filing with Arizona Corporation Commission

**Categories:** SENT to APS

Dear Neighbors

I want to thank all the residence who participated in the meeting and who already donated funds. we collected so far \$2500. Every check we received was logged in and a master copy was made for the record. Please if have not donated any funds, please do help if you can.

Kristin has been busy and doing a great Job with the lawyer we retained. Several Pleading will be filed on our behalf by Friday Feb 6. As soon as they are filed I will send a copy to all of you. I am still out of town but plan on returning tomorrow to help in anyway I can. I am going to ask the Mayor to put pressure on APS to extend the deadline. I also spoke to Congressman Frank office and told him how disappointed I am with his lack of help.

Please call Dan Hay the congressman Chief of staff tomorrow and express to him the same thing and demand that Congressman Frank act on our behalf and extend the deadline of Feb 13. His number is Phone: 623-776-7911

Also call Senator McCain office and express the same thing that we are disappointed that they did nothing. Ask them the same to pressure APS to stop this project and extend the deadline. Ask to speak to the District Director. if she does not answer leave a message The phone number is 602- 952-2410
