Nature of Complaint:

Per Ms. Ratner, she called to voice her opinion and wished to have the opinion placed in docket number E-01345A-13-0248.

APS should not be allowed a rate hike or allowed to charge people for opting out of a smart meter. APS disposed of perfectly functioning analog meters to deploy smart meters. There is evidence of wrong doing and secret meetings concerning the decision of the ACC to allow the deployment of smart meters which cause harm to some people health and which invades people's privacy. What about all the people like myself who have become ill from the smart meter of my neighbors. What about the money people like myself have had to spent because of harm caused by neighboring smart meters. Why is APS not responsible for reimbursing people for remedies for illnesses cause by smart meters. I fear the ACC is ignoring and discounting the harm that smart meters can cause to people's health and the invasion of privacy they creates. An individual has no control of how much WIFI his neighbor uses at home. Smart meters in addition to WIFI in a neighborhood cause harm to people who have heart condition and other illnesses. My neighbor recently die having spent much time in a home with a smart meter in addition to WIFI. He had a heart condition. The additional radiation from smart meters to neighborhoods with a lot of WIFI is making people sick and causing sick and elderly people to become more ill and die. Especially if their homes are not well insulated. Why is APS not responsible for reimbursing people who have become ill from smart meters in their neighborhoods? Why is APS not responsible for properly insulating people's homes and smart meters to prevent side-effects from smart meters. APS should not be allow a rate hike or the ability to charge people for opting out of smart meters. I live in a double wide home with poor insulation. People who live in such homes are subject to more side-effects to smart meters. APS should not have a rate hike for causing harm to people in their homes and causing them to have a lack of privacy on private property. Please wake up to the truth Arizona Corporation Commission.
