To: Forese-Web  
Subject: Trico: Docket No. E-01461A-15-0057 ~~SSVEC. E-01575A-15-0127 APS. 15-0248 TEP. E-01033A-15-0100 UNS.~~

Dear Commissioner Forese,

Talking Points:

Four utilities are trying to levy charges on solar customers outside of established procedures.  
Utilities shouldn't get special treatment to raise rates for solar.  
The fair process for discussing solar rates is in a rate case.  
All Commissioners, and APS, have stated that solar rates should be looked at in a rate case.  
The Commission should stick to their word and not let utilities raise rates outside of the proper venue.

Sincerely,

John Spall

**Subject:** Trico: Docket No. E-01461A-15-0057 SSVLEC. E-01375A-15-0127 APS. 13-0248 TRF. E-01375A-15-0100 GNS.

Dear Commissioner Forese,

I have previously written to inform you that the imposition of any fees exclusively on customers who choose to 'go solar'; is vastly unfair. If there is ANY movement to impose fees on utility customers in order to cover so-called 'grid maintenance' costs - then those fees should ONLY be uniformly imposed across the board on ALL customers within a utility service area. EVERYONE must share in such new fees, since EVERYONE benefits from grid maintenance. In fact, all 'grid maintenance' costs should be a separate item on everyone's bill, clearly marked and NOT included in any electricity usage charges. Customers should pay separately for electricity usage and grid maintenance charges - period.

Now, there is a new and likewise egregious problem - the potential imposition of 'solar fees' OUTSIDE of any rate case process and debate. That would also be unfair - and undemocratic, and probably illegal to boot. Utilities shouldn't get special treatment to raise rates for solar. It even goes against your own public record on the topic, since all commissioners, and APS, have stated that solar rates should be looked at in a rate case. Don't let this new egregious possibility become established practice!!!

Sincerely,

Doug Ziebell

Dear Commissioner Forese,

It has come to my attention that some of the utility companies are trying to levy taxes on solar customers outside of established procedures. Since you, as well as APS, have stated that rates should be looked at in a rate case, please stick to your word and do not let utilities raise rates outside of the proper venue. This should be properly discussed and considered carefully, with long term effects for the economy, and most importantly for the planet, taken into consideration.

Sincerely,

Deborah Berkowitz

Dear Commissioner Forese,

Are we really and truly intent on turning our country into a place where renewables are the norm? Then these tactics to discourage conversion to solar must stop. It is imperative that renewables be given a hand up not a put down. Any time there is a process of change going on some chaos arises. It is important that solar stay reasonable for consumers; we then become the ones making the power, right from our own homes. Don't succumb to tactics to discourage the average American from going to a renewable source of energy and empowering themselves in the process. In the end we all will benefit greatly and particularly our home; this beautiful Earth.

Sincerely,

Ria Childers

**Subject:** Trico: Docket No. E-01461A-15-0057 [REDACTED]  
[REDACTED]

Dear Commissioner Forese,

It is DISCRIMINATORY for the electric companies to charge one customer a certain rate and not the remainder of the customers!!!

The best way to solve this problem is for all customers to pay a transmission charge on their bills to facilitate the use of the grid. This charge could either be a flat fee of say \$10 or \$15 per month or based on kilowatt hour usage (\$.01 per kilowatt hour). Kilowatt hours used would also include the stored portion for solar customers.

Sincerely,

Ken Stencel

Sincerely,

Ken Stencel

~~1555A-15-0100 UNS:~~

Dear Commissioner Forese,

The only thing the utility companies care about is making money for their shareholders. They care nothing about their customers. Look at the salaries, benefits and perks they get. Every time you turn around they have their hand out crying poor me. They act like the people at the corner of Wal-Mart. I am sick and tired of it. If I could I would take my Solar and go off the Grid.

- Four utilities are trying to levy charges on solar customers outside of established procedures.
  - Utilities shouldn't get special treatment to raise rates for solar.
  - The fair process for discussing solar rates is in a rate case.
  - All Commissioners, and APS, have stated that solar rates should be looked at in a rate case.
  - The Commission should stick to their word and not let utilities raise rates outside of the proper venue.
- Thoroughly fed up,

Sincerely,

Paul Robinson

Dear Commissioner Forese,

Germany is the leader in solar energy and they have less sunshine than we do. We should be embracing solar in Arizona.

Do not let these four utilities go around the process for a rate case. Any tax on solar is merely a method to keep us tied to them. None of these utilities are hurting for money.

You have stated that solar rates should be a rate case and APS agreed with you.

Next week, Pope Francis will issue his encyclical on the environment. Don't be on the wrong side of that important document. Tell the four utilities, they must use the proper rate case for any change to solar power.

Thank you.

Sincerely,

Rosemarie LeClercq

Dear Commissioner Forese,

Arizona is one off just a few states that can really take advantage of power from the Sun. Solar generated electricity, which was encouraged and subsidized, is very beneficial to all except for those that SELL electricity.

The Commission has already determined that rates set for solar power should NOT be treated in isolation. They should be treated in a rate case. Do now allow ANY UTILITY TO TREAT SOLAR DIFFERENTLY. If you fail to follow through on you promise, you can not be considered believable ever again.

Fred Chalfin

Dear Commissioner Forese,

I HAVE READ THAT FOUR ARIZONA UTILITIES ARE TRYING TO RAISE NEW TAXES ON SOLAR CUSTOMERS. ONE OF THOSE UTILITIES IS APS WHICH SERVICES MY AREA. THE LAST GOVERNOR (BREWER) PUT OUT A CALL TO ARIZONA RESIDENTS TO HELP GENERATE ELECTRICITY. THAT WAS BECAUSE ARIZONA'S UTILITIES COULDN'T KEEP UP WITH THE DEMAND. NOW THAT MORE ELECTRICITY IS BEING GENERATED BY THOSE ARIZONA SOLAR PANELS, THE UTILITIES WANT MORE MONEY ALSO. I ANSWERED THE CALL AND INSTALLED SOLAR PANELS. I DID A CIVIC DUTY. NOW IT SEEMS THAT THE VERY UTILITY THAT I AM HELPING PRODUCE ELECTRICITY FOR WANTS TO PENALIZE ME? THAT NOT ONLY IS DISHONEST BUT NOT FAIR. IF THE UTILITIES WERE SO AFRAID OF OVER PRODUCING ELECTRICITY WHY DID THEY INSTALL SOLAR PANELS AT MOST OF THE PUBLIC SCHOOLS IN THIS AREA?  
THE FAIR PROCESS FOR DISCUSSING SOLAR RATES IS IN A RATE CASE (WITHIN ESTABLISHED PROCEDURES). I WOULD HOPE THAT EACH COMMISSIONER WOULD STICK TO THEIR WORD AND NOT LET THE UTILITIES RAISE RATES OUTSIDE OF THE PROPER VENUE.

Sincerely,

Randy Brumund

Dear Commissioner Forese,

SRP is undermining both future economic prosperity and National Security with their current short sighted pursuit of short term profit and their fear of any competition - even from homeowners.

The Grid, built mostly on public lands with huge infusions of TaxPayer dollars and extensive TaxPayer funded R&D, should provide for reliable power distribution avoiding massive single points of failure.

SRP treats the Grid as something they should own and use as a tool to prevent competition and drive price increases. This is anti - capitalism, and downright anti - American.

As homeowners bring Solar on line, this will lighten peak loading for SRP enabling current peak load only power generation facilities to be re-purposed to supply industrial power, boosting Arizona's position as a location for industrial - driven economic growth. and will increase the reliability and ruggedness of the Grid, if the Grid can be used as intended and not simply as SRP's tool to suppress competition and drive price increases.

SRP is clearly not the only utility following this anti- prosperity strategy, but they are my supplier and so are the one I am most familiar with.

When SRP installed remotely controlled and read meters, they saved big on sending employees to read the meter at each home. But they quickly INCREASED the "service fee" as if they had increased the cost of service instead of decreasing it significantly.

Their current strategy is one of Taxation by Corporation, and should be illegal since it is likely un-Constitutional as well.

Please treat all customer price increases as rate increases and do not allow this to continue.

Sincerely,

Robert Passano

Dear Commissioner Forese,

Why is this even a discussion? Is this not a free market? Why are solar customers penalized for being economically and environmentally responsible, when there are hundreds of thousands of other APS customers that are being subsidized through low income payment options? I am not only writing to ask that rates not be raised this year, but I'm asking they not be raised in any year! There is no justification for any solar fees. I pay my monthly servicing fees (including the current solar fees), that is sufficient. How will we as a nation ever build a smarter grid that is environmentally responsible, when your fees are dissuading people from going solar? I am sorry that APS has not kept up with technology, that's not my fault. I have concerns for our future, I just wish more people at the ACC and APS did. Instead, they worry about satisfying lobbyists and lining their pockets.

Sincerely,

Dan VanderVen

Dear Commissioner Forese,

I was sold a bill of goods to put solar on my house rooftop and now because the electric utilities want to penalize me (they call it a grid use tax) If this happens I will put in a system and get off their damn grid.

Sincerely,

Douglas Cobb

Dear Commissioner Forese,

Please do NOT let utilities raise rates outside of the proper venue. We need to support solar not tax it. We're in ARIZONA for heaven's sake!

Sincerely,

Joseph DePinto

Dear Commissioner Forese,

I am very concerned, again, when I read that instead of encouraging the utility companies to incentivise solar, the corporation commission seems to be doing the opposite either in word or deed.

The laws passed to make utilities accountable must not have strong enough sanctions.

The planet is at risk! If you are not scientists or do not trust them, look around at what is happening!

Dear Commissioner Forese,

I am writing to ask all of the commissioners to live up to their promises and not allow the utilities to raise their fees on solar customers outside of a rate case discussion. SRP has nearly killed solar in their territory with their outrageous fees, and a rate case is the only fair way to make sure everyone succeeds. Raising fees outside of a rate case would mean the commission only looks out for the utilities and not their customers. Please do the right thing and make sure ALL of the facts are presented *IN A RATE CASE* before making rash decisions. Thank you.

Sincerely,

Jim Wilber

Dear Commissioner Forese,

Please do everything you can to support anything that is good for the planet. Solar panels are a very safe and planet-friendly way to generate electricity. We should do everything we can to encourage them, not discourage them.

Sincerely,

Sierra Shafer
