DOCKETED BY [Signature]

We understand and appreciate the need for improved power supplies to the price corridor however; if running the massive lines from the Schrader substation south along the railroad tracks towards the Gila River Indian Reservation is the option that is best for SRP, we are asking that the lines be buried from the Schrader substation to at least Chandler Heights. From Chandler Heights to Riggs Road, the lines can come back above ground as this is all industrial and a golf course however; in support of our neighbors south of Riggs, the lines should again be buried until they are on the Gila River Indian Reservation.

Having these lines just outside of my front door will not only be an eyesore, it will negatively impact the value of my home. I am confident that the homeowners that flank either side of the railroad track would peacefully agree to have the lines heads south towards the Gila River Indian Reservation if the lines were buried as I have outlined above.

Respectfully,
