Subject: SRP Price Road Corridor

(L-00000B-15-0059-00170)

Dear Commissioner Forese,
I have written before but feel obligated once more.

I know there has been numerous public presentations and contact information shared with the community. At this point I have seen nothing that suggests a desire on the part of SRP to be other than concerned with what is in the best and least expensive route for them and what they can also use to address potential further development south and west of the Hunt Highway and Price Road. To suggest any concern for the home owners, primarily in the Sun Lakes community, is simply just appeasing them while moving in the only direction they want. The construction of these totally obtrusive power lines will be a totally inconsiderate abuse of what those who have retired to this area did so for. The other options in already developed manufacturing and retail areas plus a more reduced area of populous just doesn't make any sense except for financial positives for SRP.

Please do not approve SRP's request for the Price Road & Hunt Highway option.
