Even tho' I already have solar on my roof I'm considering all those who would not go thru with it because it would reduce their savings and make it a longer pay out time in order to be a viable alternative. TEP would have to pay more for any other type of generation of power. This power is energy efficient without causing damage to the ecosystem. Do not allow TEP to deter future power providers by decreasing the amount they are willing to buy from the public.

Thank you
Sincerely
Marilyn Klepinger
