Arizona Corporation Commission
DOCKETED

MAR 31 2015

Customer sent the following -

Please deny TRICO's proposed change to the current Net Metering tariff.

DOCKETED BY

I believe that TRICO has a valid point concerning grid maintenance and other fixed costs. However, their approach of changing the payoff for excess generated energy to monthly from annually is totally unrelated to the fixed cost issue, and is severely misguided.

The correct approach is to accurately separate fixed costs and energy usage, and bill them separately. At a given system capacity, fixed costs are not related to the amount of energy actual used. (and PV generation actually LOWERS fixed costs by reducing needed grid capacity, which benefits all customers) All customers, PV generating or otherwise, should pay the same monthly charge for the same grid access and maintenance and other fixed costs.

***** E-01461A-15-0057 *****

Customer sent the following -

If Trico needs to share the cost to maintain their grid it should implemented in general fee to all users not just new PV owners. They have a \$15 monthly charge for that which is not explain or broken out. That charge should be increase if needed so that all users would share the cost.
