DOCKET CENTER

SSVEC stated that 5% of 55000 customers, or 1020 customers, are solar and they are costing SSVEC, 1 million dollars a year. That breaks down to \$81.69 per month just to supply us our energy. That does not include the cost of the energy you use each month. If you are an average customer, during the winter months, you don't use that much power, so will you be subject to a surcharge also? What SSVEC is truly stating is that they need to charge all customers \$81.69 per month just to be hooked up to the grid so you can purchase energy from SSVEC.
