\*\*\*\*\* DOCKET # L-00000B-15-0059-00170 \*\*\*\*\*

APR 30 2015

DOCKETED BY

Customer sent the following -

As a resident of South Chandler who has been involved with the SRP line siting process for the Price Road 230kV project since the very beginning, and as a member of the SRP PRC working group, I want to cal attention to the fact that the route proposed on this docket is the result of an exhaustive process of meetings and community involvement. From the very beginning, the communities affected by the proposed line have overwhelmingly stated their route preference would be to use GRIC land if possible - and where lines must traverse or abut private land, that using existing power line corridors, railroad corridors and canal corridors would have the least impact to the community as a whole. The route proposed on this docket represents this route, as it maximizes the use of GRIC land and existing power line corridors. This route is the least destructive to the communities of Chandler and Sun Lakes.
