Nature of Complaint:

\*\*\*\*\* E-01461A-15-0057 \*\*\*\*\*

Customer sent the following -

Arizona should be leading the country in solar programs but sadly, we are not. Approving this will only make us fall even farther behind. Our community shouldn't be penalized for Trico's failure to keep up with its consumers' demands and current technology, especially since they are a monopoly. Trico's current solar programs are inadequate to meet our demands, as evidenced by the number of applications received for interconnecting DG systems. Why is Trico unprepared? There has been an increased demand in solar programs throughout our country for many years now. In this case, members should have an alternative. Other utilities across the country provide residential solar programs. Is Trico working on this? The time frame of this proposal from application to cut off date is unacceptable and does not offer Trico's members ample time to respond and take action against this proposal. Let's work together to make our state's solar programs serve as a model for other states across the country.
