IN THE MATTER OF THE APPLICATION OF SALT RIVER PROJECT AGRICULTURAL IMPROVEMENT AND POWER DISTRICT, IN CONFORMANCE WITH THE REQUIREMENTS OF ARIZONA REVISED STATUTES, SECTIONS 40-360, et. seq., FOR A CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY AUTHORIZING THE PRICE ROAD CORRIDOR PROJECT, NON-GILA RIVER INDIAN COMMUNITY PORTION LOCATED IN THE CITY OF CHANDLER, ARIZONA OR WITHIN MARICOPA COUNTY.

Docket No. L-00000B-15-0059-00170

Case No. 170

APPLICANT'S NOTICE OF FILING

Arizona Corporation Commission

DOCKETED

APR 29 2015

DOCKETED BY

The Applicant, the Salt River Project Agricultural Improvement and Power District (SRP) makes this notice to the Commission that Condition 22 of the Siting Committee's Certificate of Environmental Compatibility (CEC) for this Project, has been clarified by a letter from Intel Corporation which has been filed in this docket.

Condition 22 provides:

22. The Applicant shall construct the transmission lines into the RS-28 Substation within a 150 foot corridor (except as they enter from the Gila River Indian Community). The corridor centerline shall be located 650 feet north of the Sun Lakes wall. The corridor shall be moved further to the south as may be subsequently determined by an Intel feasibility study, consistent with Intel Corporation's Chandler Preliminary Development Plan Amendment (PDP) 14-0007, but in no event further south than a corridor centerline of 475 feet from the Sun Lakes wall. The Applicant will work with Intel Corporation and the Sun Lakes Executive Committee to develop a mitigation plan to address the impacts of the Project on Sun Lakes residents.

The condition reflects the desire of Sun Lakes that the corridor center line be located 650 feet from the Sun Lakes north wall, and the uncertainty of Intel's ability to locate the

1 transmission corridor in the location requested by Sun Lakes. The condition was designed to
2 allow for additional time for Sun Lakes and Intel to continue their discussions.

3 Attached is the letter from Intel which summarizes these later discussions. The Intel
4 letter summarizes its discussions with John Porter, Sun Lakes HOA President, pertaining to the
5 location of the transmission lines into the new RS-28 Substation that will be constructed on
6 Intel's property. Consistent with the results of Intel's feasibility study, Intel agrees with the
7 language included in Condition 22 of the CEC that the centerline of the 150 foot transmission
8 corridor can be located 650 north of the Sun Lakes wall without infringing upon Intel's plans for
9 future growth of its facilities. Intel also commits to working with Sun Lakes on a mitigation
10 plan that will allow funding for landscaping.

11 SRP appreciates Intel's and Sun Lakes' cooperation in this siting effort.

12 DATED this 29th day of April, 2015.

Re: Docket #L-00000B-15-0059-00170

Representatives from Intel Corporation and John Porter, Sun Lakes HOA President, met on April 9, 2015 to discuss the results of the feasibility study in regards to the RS-28 Substation location. Intel has concluded its feasibility study and determined that the centerline of the easement can be located at 650 feet north of the Sun Lakes wall. If the easement is moved further north from 650 feet, it will have an impact to Intel's Preliminary Development Plan Amendment (PDP) 14-0007 and future growth of the Intel Ocotillo site. Intel will work with Sun Lakes on the mitigation plan that will allow funding for landscaping.
