My complaint is that I don't have an option of going out and finding another utility service - I am STUCK with Trico. And the changes to their net metering...are not fair or right.

In fact - it does not seem legal.

Thank you for looking into this matter.

Trico Electric Cooperative has effectively stopped the solar market in its territory by unilaterally changing its solar net metering tariff on February 28, 2015. This tariff change is illegal in that it changes a tariff before the ACC has made a decision on Trico's application for a new tariff. ( See Docket # E-01461A-15-0057). ACC Rules at R14-2-212F(3) state clearly : "Any proposed change to the tariffs on file with the Commission shall not be effective until reviewed and approved by the Commission. I am a father of three and want green energy for my kids, with this new rule solar will no longer financially beneficial. With the decrease in solar sales next year already anticipated from the removal of the solar tax incentive Trico has basically preemptively put southern Tucson solar out of business. Please investigate this sooner than later. Thank you. Concerned customer and hopefully a future user of solar.
