Dear members of the AZ. Corporation Commission:

We moved into our home in Pinelake Estates in January, 2015. We purchased our home in this community because we love the pine trees and lake. We are originally from MN and this just feels like home. We recently retired and get countless hours of enjoyment watching the birds that fly over and land in the lake. Just this morning about 20 cormorants landed in our bay and as they were leap fragging over each other in the water, a grey heron watched from our shoreline. It was so exciting! We would hope to keep the view of tl ese wonderful birds without seeing the towering power lines that SRP is planning on building next to the railroad tracks that are close to our home. Our grandchildren are small, ages 4, 2 and 16 months. We look forward to teaching thm how to fish on this lake and enjoy the western sunsets without having to look through 160 feet high power lines.

My mother is elderly and has a deep brain stimulator (dbs) implanted to help control the painful tremors she has from her Parkinson's disease. Will these power lines affect this stimulator? I have a friend whose father had a dbs system and he was told by his neurologist to stay away from power lines. Does this mean she will not be able to visit us? How close do you have to be before it affects her programming? I am currently awaiting a call from my mom's neurologist to get her opinion.

We respectfully ask that you APPROVE THE PROJECT WITH MODIFICATIONS. The modification we are asking for is that SRP BURY THE LINES FROM THE SCHRADER SUB STATION TO THE GILA RIVER

ARIZONA CORPORATION COMMISSION

UTILITY COMPLAINT FORM

INDIAN RESERVATION -A DISTANCE OF APPROXIMATELY 2.7 MILES. Why should our neighborhood and surrounding neighborhoods suffer from dropping property values, ugly skylines and health and safety issues, when so many members of the Chandler community, Gila River Indian Community and Business Community along the Price Road Corridor will benefit from the increased electrical capabilities this solar farm will produce? SRP stands to make a lot of money with this project in the upcoming years - should they be able to do this at the expense of neighborhoods?
