Selam Lema

I support the docket number# L-00000B-15-0059-00170, that I want the ACC to approve the GRIC route and eliminate the Germann Road from the option and should never be considered as a proposed route again.

Regards,
Selam

Refer to docket number# L-00000B-15-0059-00170. I emphatically request the ACC to APPROVE the GRIC route as I am a fairly new homeowner in the Brittany Heights neighborhood just north west of German and Dobson roads. This neighborhood was selected by our family to raise our children in a safe and beautiful community and the power lines proposed will essentially destroy that beauty. This should never have been proposed in an established neighborhood and should never be a considered route again. This would be a different case if the power lines were already established and we purchased land or a home with this already in existence. This is NOT something any homeowner wants to view or have to deal with regarding home values, and aesthetics of our community in which we live, work and play.

Thank you for listening to our community voice.

Please vote for The docket number# L-00000B-15-0059-00170; the GRIC route for the new power lines. Germann road should never have been considered, this is a mature residential area that has been built with pride for years. We have made our wishes clear and the GRIC route is a much better choice for this type of project. Germann road should never be considered as a proposed route again.

Thank you,
Lorraine Cordo

As a long time resident in Chandler, I know first hand how many people's life will be adversely affected if the power line goes through Germann road. There are quite some churches, schools or day cares and a lot of residents. GRIC is overall the best route for vast majority of residents in Chandler. Please help approving the proposal. Thank you!

Docket number# L-00000B-15-0059-00170.

I want the ACC to APPROVE the GRIC route. This is because it will minimize impact to private land, homes and businesses. Additionally, it enables tribal economic development and allows for a potential GRIC-owned solar generating plant on tribal land. Germann Road should never be considered as a proposed route again.

Thank you.

Lee

Regarding # L-00000B-15-0059-00170

Please approve the GRIC route. Power lines of this size should not be located on Germann road near so many residences, schools and businesses. The Germann Road route should never be considered for this type of power lines.

I am in favor of the proposed route (Docket number# L-00000B-15-0059-00170) to place high voltage power lines along the Gila River Indian Community. I urge the ACC to approve the route as presented. Many years of work, research and effort have gone into determining the route that will impact the least amount of people with the best possible outcome. Germann Rd should never be considered an alternative as this is an established, highly residential area and would cause a severe, negative impact on a large portion of the population in several different ways. The GRIC route is the most logical route.

With regard to Docket # L-00000B-15-0059-00170, I am "For" the approved route on the docket. This route utilizes GRIC land and runs along railroad tracks in many areas and much of the route already has existing power lines visible and residents are used to seeing them there. SRP and the citizens of Chandler and Sun Lakes spent years of meetings getting to this eventual route for this project and there is no question this is the least destructive route to most neighborhoods, schools, etc. This is the correct route for the power lines and the only question should be whether they are buried along portions of this route or they are above ground throughout the route. I would prefer the lines are buried in some areas for our neighbors near the railroad tracks and in Sun Lakes, but this is the correct route and the docket should not be outright rejected.

I ask the ACC to approve the Gila River Indian Community (GRIC) route. It is the best option for bringing the extra power needed into the PRC. SRP has done a good job of their community public process and I am pleased with the GRIC route decision after their 2 years of community outreach. My neighborhood is on Germann Road and is a built up, densely populated community. Under no circumstances should it be put back on a proposed route for these power lines.

Docket number# L-00000B-15-0059-00170

Please approve the GRIC route and remove the Germann Road proposed route. Chandler property values would be negatively impacted, as well as the health, safety, and general welfare of our community. Please respect the members of the Chandler community who purchased and built homes with the understanding that nothing this monstrous would ever be so close.

The docket number# L-00000B-15-0059-00170

Hi - Being a resident of Arden Park, I take pride in our neighborhood being one of the cleanest, safest, with residents from all walks of life respectful of each other and trying to maintain the value of our neighborhood. Being close to amenities that we have come to depend on including great schools, hospitals, pharmacies and shopping, I cannot help but think that this is one of the ideal neighborhoods to make a home in.

When we first heard that SRP was considering Germann as one of their routes for the high tension wire, we were appalled at the prospect. We grouped, consulted and made a strong recommendation as to why SRP need to reconsider their route and select the GRIC corridor as a better option. Now that we have the agreement in place, I want the ACC to Approve the GRIC route and and that Germann Road should never be considered as a proposed route again.

Thank you for your consideration in this regard, Vishwa Hassan

Dear Sir/Madam

I am writing this letter with regard to the docket number# L-00000B-15-0059-00170. I want the ACC to APPROVE the GRIC route, because this so far is the best option for all of the communities in this area. The GRIC route minimized the power line impact. Germann Road should never be considered as a proposed route simply because it is a dense resident area and there are multiple churches, schools and shopping centers around this route. In this area such high voltage power lines should never be considered.

Thanks for your time!

Yonghao

Dear Sir/Madam

I am writing this letter with regard to the docket number# L-00000B-15-0059-00170. I want the ACC to APPROVE the GRIC route, because this so far is the best option for all of the communities in this area. The GRIC route minimized the power line impact. Germann Road should never be considered as a proposed route simply because it is a dense resident area and there are multiple churches, schools and shopping centers around this route. In this area such high voltage power lines should never be considered.

Thanks for your time!

Yan

Sujal Bhat

Docket number# L-00000B-15-0059-00170.

I request ACC to Approve the GRIC route. GRIC is the right choice to host the powerlines. This keeps the high voltage power lines away from residential areas and also benefits GRIC community

Germann Road should never be considered as a proposed route - as there are many families with young kids , mine included, living along the communities adjacent to Germann road that will be impacted by the High Voltage Power lines.

As a homeowner in stonefield community located at germann road, i strongly support the ACC to approve the GRIC Route(The docket number# L-00000B-15-0059-00170). The proposed route will give us the best benefits. First it avoids to impact the residential area as much as possible. Second it meets potential future development needs for the indian reservation area. That is why SRP gets all required agreement from indian tribe. Since SRP already made a decision to take Germann road out of the application, i strongly ask the ACC to never consider the Germann road as an option. I want to maintain the beauty and peace environment of our community and protect our kids free of the potential risk of high voltage.

Dear AZ Corporation Commission:

This letter is in regards to your decision on Docket Number L-00000B-15-0059-00170 which is to take place in the next 30-60 days. I own a home in Pinelake Estates less than 100 yards from the proposed construction of the above ground high voltage transmission lines that will run south from the Schrader Substation to the Gila River Indian Community.

If this project is approved by you, it will have a huge impact on our neighborhood and all those along this 2.7 mile area. Having 150 ft. towers less than 100 yards from my door will destroy the visual and aesthetics of mine and every house in this community. This will also have a negative effect on our property values of at least 8-10%.

I understand high power lines need to be run, but please make SRP bury these lines for the sake of your fellow citizens. Do the right thing since SRP doesn't want too. SRP says it's more costly to bury lines which it is, but statistics show it's about 3 times the cost which would probably cost an extra 6 million dollars. If the 1,000 homes along this area each lose \$50,000 in value because of the lines that's a property loss of \$50 million dollars not counting the loss of property taxes because of the devaluation.

I would ask that you take a couple of hours and drive over to this area where the lines will be running and consider the aesthetic effect. If this were your neighborhood how would you feel? Just make SRP modify their plan and bury the high power lines.
