Subject: SOLAR ENERGY PROPOSED FEES

As someone who has, in fact, subsidized TEP by installing an onsite solar array on my property 5 years ago, I am opposed to any rate changes for solar power users. Installing my solar panel array cost me over \$27,000 in out-of-pocket expenses (that number is actual expense after tax rebates). I expect to amortize that cost next year, i.e. a 6 year investment. During those 5 years of use, I overproduced electrical energy which was the provided to TEP at a fraction of the price they are selling that energy to consumers. I request that any future proposal by TEP to increase rates for solar energy users be rejected.

Further, the State of Arizona has the opportunity to lead the nation in utilization of non-fossil fuel energy. The State can distinguish itself on a national scale while serving the needs of its citizens with clean, efficient energy.

Sincerely,

Dennis Winsten
