Nature Of Opinion

Docket Number: E-01575A-15-0312 Docket Position: Against

Good Day ACC Representatives, SSVEC's short suspense notices seem suspicious. I recently purchased my Roof Top Solar system based on environmental concerns, carbon foot print, and of course return on investment based on SSVEC's billing cost model. Recent newspaper articles and mailers have caused a great many people grave concerns and if approved will terminate the entire private solar business for this region. SSVEC states they are losing \$1 mil annually in O&M costs due to 1,020 solar users. What are the other the other 54,000 SSVEC households paying per month? I know people who are paying under \$60 a month. Who is subsidizing their electrical usage/shared O&M infrastructure costs? Based on SSVEC "fair cost" sharing statement every user should pay \$82.00 per month + 12 1/2 cents per kilowatt hour. SSVEC states they are pro-solar, it is obvious with their anti-homeowner solar stance that they want to monopolize solar energy and have the consumers pay for the SSVEC solar arrays.

To: Utilities Div - Mailbox
Subject: All of your customers deserve solar choice.

Dear Utility Division,

Solar power is good for Arizona, and provides homeowners a choice in how they power their homes. Your customers deserve that choice.

SSVEC has launched an attack on energy freedom by proposing unfair taxes on homes that produce their own power through rooftop solar outside of the proper procedure of a rate case. SSVEC is planning to sneak in a special hearing to tax solar customers despite the fact they are planning a rate case in the very near future.

Please oppose SSVEC's proposal. Don't waste customer money and resources on a hearing to tax solar customers, particularly with a rate case in the near future. They should review all rates, including solar rates, in a rate case.

Sincerely,

DONALD MULARZ

Subject: SSVEC should review all rates, including solar rates, in a rate case.

Dear Utility Division,

All Americans deserve the ability to power their own homes, and get fair credit for the energy they produce. SSVEC has launched an attack on individual choice and property rights by proposing high taxes on homes that produce their own power, and they've launched this attack outside of the proper procedure of a rate case.

SSVEC is trying to ram through a discriminatory solar hearing despite the fact they are planning a rate case in the very near future. Please don't let SSVEC waste customer money and resources. They should review all rates, including solar rates, in a rate case.

Sincerely,

Kenneth Sampson
