October 15, 2015

DOCKETED BY *[Signature]*

Line Siting Committee, Docket Number, L-00000YY-15-0318-00171

As hard as it seems for many to believe, land that is not developed is not worthless until a giant foot print is placed on it. Instead, these lands need to remain a working landscape that both preserves open space and allows for range and wildlife management in such a way that it both preserves the western life style Arizona is known for and allows for the public to be a part of this practice. What I would like for you to do is truly form one single reason to destroy one of Arizona's greatest gems when other routes already compromised by technology are much better options.

Sincerely,

Anna Magoffin
