Dear Commissioners

My husband and I are retired and spent our hard earn money to install a nice solar system several years ago to help out on powering the grid and saving the environment for future generation. My husband has design and installed many energy saving components in the house beside helping other in the neighborhood to save energy.

It has been my understanding that the Arizona Corporation Commission was in place to help protect consumers. Our community and many others in other community have help APS and other utilities save money as Arizona grows in population the utilities companies don't need increase their inter-structure capacity because individual like us provide that needed energy for that community. The commissioners should encourage more solar, and not penalize the one now with allowing APS to rate hike on Solar individual now. This is wrong way of thinking.

Please turn down the request by APS and other Utilities Companies requesting rate hike on consumer who are trying the best to help out. Punish the helper so company can profit not best solution to their problems. These companies can profit if they cut fat out of their organization.

Thanks tor your time

Sincerely

Beverly

Arizona Corporation Commission
