ELECTRIC

Dear Sirs/ Maam

T.E.P. is asking for a rate hike. Included is getting rid of the credit feature of Solar by putting electricity back on the grid T.E.P., this gives TEP another rate hike plus free electricity to sell back to the public for even more profit. This credit feature does not cost T.E.P. any money but it saves the individual some money it allows them to use the electricity they generated not T.E.P. . If you allow T.E.P. to eliminate the credit feature then you are damaging all of the individuals who have tried to save some money by going Solar and trying to the right thing environmentally. By eliminating the credit feature you will damage future installations of Solar power by reducing one of the main incentives and will hurt the Solar Industry in Arizona. Is it worth hurting an industry just to appease one company? I urge you not to let this happen. E-01933A-15-0239
