Phoenix Arizona
Chairman Bitter Smith and Commissioners

September 18 2015

RE: UNS Electric Energy Efficiency programs, Docket No. E-O4204A-14-0178
Letter of SUPPORT for action and requesting your action to support.

Attention Honorable Chairman Bitter Smith and Honorable Commissioners
I am a UNS power user, Jack Ehrhardt-4105 N Adams St. Kingman Az. 86409-ph,9287276100

April of this year President Obama signed a bill to boost energy efficiency in Buildings. Our President did this to further lead us toward greater Energy Efficiency and the current UNS Energy Efficiency programs that are before you for approval, reflect a parallel effort to make our Nation a better place. These programs will create a new level of jobs that have a future as we make the transition to increased Energy Efficiency. No good will happen with out the support of these programs.

As our large Mega Watt power plants strain to provide everyone the energy they need , simultaneously a Mega Strain is being put on our environmental resources, depleting diminishing water assets and air quality assaulted.

All of you on the Commission know this -with out question.....
The question is, are you going vote with your conscience that feels the responsibility to doing what is right for the future
Or give in to peer and political pressure and let this program fade.
Please move to make the expansion of the cost -effective Energy Efficiency programs in the UNS Electric service area and approve funding to continue existing programs,

Respectfully Submitted;

Jack Ehrhardt
4105 N. Adams St. Kingman Az 86409
