**RE: Grid Access Charge Docket # E-01345A-13-0248**

Dear Commissioners:

At Chicanos Por La Causa, Inc. (CPLC), we offer extensive services to both rural and urban areas, helping more than 200,000 low-income people annually regardless of ethnicity, gender, age, or creed. Our focus is to provide the "**promise of opportunity**" to all through economic development, education, health and human services, and housing. Much of our success is a result of working closely with committed community partners to generate even more opportunities to those with the greatest need.

One distinguished partner, Arizona Public Service (APS), is a community business leader with a long history of providing fair and balanced pricing for all customers. It is with this in mind that we ask you to please **immediately** consider APS's proposed **Grid Access Charge** filed in April of this year with the ACC. APS's proposal ensures that everyone, solar and non solar customers, share equitably in supporting a modernized grid which will power Arizona's economy for years to come. In addition, CPLC believes that considering this proposal **now** represents a positive step toward a fair and balanced solution for all consumers in the upcoming APS rate case. A delay in reviewing this could negatively impact many of their customers especially those who are low income and may not be able to afford solar energy.

CPLC supports APS's proposed **Grid Access Charge** and believe that this plan will continue to enable them to provide fair and balanced pricing for all their customers.

Sincerely,

David Adame  
President & CEO  
Chicanos Por La Causa, Inc.
