SECTION 3 - DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services

See Section 7.1 for Operator Toll Assistance Services Rates and Charges

3.1.1 General

Operator Toll Assistance Services include a variety of billing options. Callers may use Operator Toll Assistance Services to place intrastate calls from their presubscribed telephone line or when away from their established primary Service location. Calls can originate from either tone-generating or rotary-dial instruments. Unless otherwise indicated in this Tariff, all calls are billed in increments of one (1) minute subject to a minimum connect time (initial period) of one (1) minute. See Section 7 for rates and charges.

3.1.2 Availability

Service is available to a Customer that subscribes to any of the Company's outbound offerings.

3.1.3 Access Method

(A) Callers dialing one plus (1+) one of the Company's Toll Free Access Numbers over Switched Access lines will hear recorded messages that guide the caller. Callers may elect to use any of the billing options described in this Tariff or they may reach the operator for assistance. Callers placing a call from a tone-generating telephone may select one of the various Operator Toll Assistance Services options by pressing the appropriate key on their tone-generating telephone. The call will default to an operator for assistance if (1) the call originates from a rotary telephone or (2) the call originates from a tone-generating telephone and the caller fails to make a selection on its keypad.

(B) Unless otherwise indicated in this Tariff, callers may also place Operator Toll Assistance Services from Off-Net locations by dialing:

- .1 00 from a presubscribed telephone line and request the long distance operator to complete the call or
- .2 0+ the called number from a presubscribed telephone line

(C) Unless otherwise indicated in this Tariff, callers may also place Operator Toll Assistance Services from On-Net locations by dialing:

(B) Person-to-Person¹: Any operator-handled call whereby the person originating the call specifies to the operator a particular person to be reached, or a particular station, room number, department, or office to be reached through a PBX attendant. (T)

SECTION 3 - DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services (continued)

3.1.5 Billing Options (continued)

(B) Collec¹

(T)

This is a billing option where the called party is verbally asked if they will pay for the call. If accepted the call is completed, the called party is billed for the call. Calls may be billed to domestic numbers only.

(C) Third Number¹

(T)

This is a billing option where a long distance call may be charged to a telephone number other than the originating telephone number or the telephone number of the called party. Prior to completing the call, the operator will determine whether or not the charges are authorized to be billed to the third number. Calls may be billed to domestic numbers only.

(D) Sent Paid

This is a billing option where the Customer originating the call pays for the call by having the call billed to the originating telephone number. This billing option will initially be restricted from coin origination.

3.1.6 Level of Automation

Operator Toll Assistance Services calls may be completed with or without assistance of an operator. There are three (3) levels of automation for Operator Toll Assistance Services. They are:

(A) Operator Dialed

An operator dialed call occurs when the person originating the call has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dials the called number and the billing number. The operator dialed per call charge applies in lieu of the operator assisted per call charge.

The rates for the operator dialed per call charges Section 7 apply to: Station-to-Station and Person-to-Person calls when the caller has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dialed per call charge will not be applied to:

- .1 a call that cannot be completed by the caller due to equipment failure or trouble on the long distance network or
- .2 a call placed by a party identified as disabled and as a result of that disability cannot complete the call.

¹Effective March 18, 2016 this Billing Option will be discontinued and withdrawn from operation.

SECTION 3 - DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services (continued)

3.1.7 Application of Charges (continued)

- (C) If a Customer or End User completes an Operator Toll Assistance Service call via any Operator Toll Assistance Services access method described in this Tariff, the rates and charges contained in Section 7 will apply to intrastate InterLATA calls and to intrastate IntraLATA calls.
- (D) If a Customer completes an Operator Toll Assistance Service call via any of the Group 2 Toll Free Access Numbers, this Tariff applies to both intrastate InterLATA and intrastate IntraLATA calls.

3.1.8 Busy Line Verify/Interrupt¹

(T)

(A) Description

Busy Line Verify and/or Interrupt service is provided where facilities and operating conditions permit. The operator will verify a busy line condition and/or interrupt a conversation at the calling party's request. Interrupt charges are in addition to Verify charges. See Section 7 for rates.

(B) Regulations

A charge applies to each busy line verified or conversation interrupted except for the following conditions: (a) the operator finds the called station out of order; and/or (b) the service request is to/from any public agency that is responsible for providing emergency aid.
