II.	Discussion of Energy Efficiency Enabling Provision Results.....	2
III.	Summary	4
Attachment	Summary of Monthly Bill Impacts With and Without Energy Efficiency Enabling Provision Adjustments by Sector and Rate Schedule	

SOUTHWEST GAS CORPORATION

I. INTRODUCTION

Southwest Gas Corporation (Southwest Gas or the Company) hereby submits its 2015 third quarter report on the performance of the Energy Efficiency Enabling Provision (EEP).

In the Opinion and Order in Docket No. G-01551A-10-0458, Decision No. 72723, the Arizona Corporation Commission (Commission) authorized Southwest Gas to implement the EEP. The EEP contains two components, a monthly weather adjustment and an annual non-weather component to ensure the Company recovers its Commission-authorized revenue per customer. The weather component adjusts customer bills when actual weather during the winter months (November – April) varies from the normalized weather used in the development of authorized rates. The EEP also tracks the non-weather differences between the Company's authorized revenues per customer and its actual revenues per customer, including a process to recover under-collections from and return over-collections to customers on an annual basis. The combination of these two components results in the Company recovering its Commission-authorized revenue per customer – no more, no less.

The monthly weather adjustment applies to customer bills rendered from November 1 through April 30. No weather adjustment was made during the reporting period of July through September. Customers receive a credit of \$0.02626 per therm for the annual non-weather component of the EEP, which became effective January 1, 2015.

II. DISCUSSION

This report is for the quarterly period July 1, 2015 through September 30, 2015. Bill analyses have been prepared by residential and non-residential sectors and by rate schedule. The rate schedules included in the residential sector are Single-Family Residential (Schedule No. G-5), Multi-Family Residential (Schedule No. G-6), Single-Family Low Income Residential (Schedule No. G-10), and Multi-Family Low Income Residential (Schedule No. G-11). The rate schedules included in the non-residential sector are Small General Service (Schedule No. G-25(S)), Medium General Service (Schedule No. G-25(M)), Large-1 General Service (Schedule No. G-25(L1)), and Large-2 General Service (Schedule No. G-25(L2)).

As described in the previous section, the EEP contains two components, a monthly weather adjustment and an annual non-weather component to ensure the Company recovers its Commission-authorized revenue per customer. The monthly weather adjustment works to mitigate the “peaks and valleys” that abnormal weather can have on customer bills. The annual non-weather component compares authorized revenues and actual revenues and recovers or returns differences between authorized and actual revenues in a per therm rate adjustment. In April 2014, Southwest Gas filed an application with the Commission

seeking to return a deferred credit balance in the non-weather revenue component of approximately \$11.6 million to customers. The application was approved in December 2014 (Decision No. 74862) and a credit of \$0.02626 per therm became effective January 1, 2015. This quarterly report shows the effect of the non-weather component on customer bills during the third quarter of 2015.

Table 1 summarizes the third quarter bill impacts for the residential and non-residential sectors. The average EEP adjustments in this reporting period represents the credit to customers for the non-weather component of the EEP. As reported in the 2014 Third Quarter EEP Report, the average residential adjustment was \$(0.04).

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Residential Sector	\$ 21.18	\$ 21.41	\$ (0.23)
Non-Residential Sector	\$ 252.47	\$ 258.37	\$ (5.90)

Table 2 summarizes the results for the 2015 third quarter for each customer class included in the EEP.

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Single-Family Residential	\$ 21.40	\$ 21.63	\$ (0.23)
Single-Family Low Income	\$ 18.56	\$ 18.73	\$ (0.17)

Table 2- Average Bill by Customer Class

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Multi-Family Residential	\$ 19.07	\$ 19.27	\$ (0.20)
Multi-Family Low Income	\$ 19.12	\$ 19.30	\$ (0.18)
Small General Service	\$ 36.13	\$ 36.30	\$ (0.17)
Medium General Service	\$ 190.21	\$ 194.17	\$ (3.96)
Large-1 General Service	\$ 874.12	\$ 896.63	\$ (22.51)
Large-2 General Service	\$ 4,364.72	\$ 4,492.06	\$ (127.34)

The Attachment contains schedules showing the detail of the differences between average bills with the EEP adjustment and average bills without the EEP adjustment for residential/non-residential sectors and for each rate schedule for the quarter and by month for July, August and September 2015.

III. SUMMARY

The EEP continues to perform as intended. Since January 2012 when the monthly weather adjustment was first implemented, the monthly weather adjustment has financially protected both customers and the Company. The weather adjustment stabilizes customer bills by providing customers timely relief from colder-than-normal weather when their natural gas bills are the highest, and upward adjustments to bills when the weather is warmer than normal and bills are the lowest. The annual non-weather component further ensures the Company only recovers the Commission authorized revenue per customer – no more, no less. Customers are currently experiencing the benefit of the non-weather component as the deferred balance is refunded through rates.
