Re: AT&T Corp.
Docket No. T-20872A-15-0399

Enclosed for filing with the Commission are an original and thirteen (13) copies of revisions to AT&T Corp.'s ("AT&T") Local Exchange Services tariff. The purpose of this filing is to grandfather certain ABN Local products and also remove some local plans that have no customers.

The affected tariff pages are listed in Attachment A. Customers were notified via direct mail and bill message.

The requested filing date is November 30, 2015 with an effective date of December 30 2015.

If you have any questions or concerns, please call me at (775) 333-3991.

Sincerely,

Janice L. Ono w/permission

LOCAL EXCHANGE SERVICES TARIFF

ISSUED: NOVEMBER 30, 2015

SECTION 7

EFFECTIVE: DECEMBER 30, 2015

2ND REVISED PAGE 2

BY: LINDA GUAY-TARIFF ADMINISTRATOR

CANCELS 1ST REVISED PAGE 2

7. AT&T LOCAL EXCHANGE SERVICES

7.2 Monthly Recurring Charges

AT&T Local Exchange Services are subject to monthly recurring charges on a per-line or per-trunk basis. Customers who order AT&T Local Exchange Services associated with any of the following long distance services will be charged the Monthly Recurring charges as shown in the Price List: AT&T OneNet Option¹ or AT&T Business Network Service^{1,2}. All other AT&T Local Exchange Services customers will be charged as shown in the Price List.

(D) (T)

AT&T Local Exchange Services associated with ACC Business Service³ are subject to monthly recurring charges on a per-line basis and will be charged as shown in the Price List.

DID number blocks are subject to monthly recurring charges for the initial block of 20 numbers and for each additional block of 10 numbers. Customers who order AT&T Local Exchange Services associated with any of the following long distance services will be charged the Monthly Recurring charges as shown in the Price List: AT&T OneNet Option¹ or AT&T Business Network Service. All other AT&T Local Exchange Services customers will be charged as shown in the Price List.

(D) (T)

¹ AT&T Business Network Service usage rates are available only when the Calling Party Number is the same as the Billing Telephone Number (BTN) or the Local Account Number Identifier (LANI).

² **Customer Not Ready Charges** - AT&T may begin billing customers the monthly recurring charges for access when the customer refuses or delays installation of service. If the customer reschedules or refuses service after 30 days of their Firm Commitment date, AT&T may bill the customer the monthly recurring charges for access beginning thirty-one (31) days after the original installation date. **Vendor No Show Charges** - AT&T may begin billing customers the monthly recurring charges for access as a result of the customer's vendor not showing up at the time of cutover. The first time the customer's vendor does not show up, the customer will be requested to reschedule a new date within 14 days. If the customer's vendor is a No Show twice, AT&T may begin billing the customer the monthly recurring charges for access.

³ Effective October 22, 2008, the "AT&T OneNet Option" and "ACC Business" will be grandfathered, and the Local Exchange Services provided under that tariff will not be available to new customers. Customers with services provided under that Tariff will continue to receive the service(s) pursuant to the terms and conditions of their contract until their current contract expires. Upon expiration of the customer's current contract term and if the customer does not disconnect the service(s) (if available), customer will be billed at the month-to-month non-term.

SECTION 7
1ST REVISED PAGE 4
CANCELS ORIGINAL PAGE 4

7. AT&T LOCAL EXCHANGE SERVICES

7.3 Non-Recurring Charges (continued)

F. Pre-Installation Cancellation Charge

Pre-Installation Cancellation Charge is assessed when a Customer, after accepting a customer-concurred due (CCD) date from the service provider, cancels the entire Local Service order prior to completed installation. This charge also applies when the Customer accepts only partial installation of the Local Service order at the accepted CCD date and further installation must be scheduled for a later date.

G. 25 Pair Termination Block Charge

A 25 Pair Termination Block Charge is assessed if the Customer requires an RJ21X hand-off device to be installed in order to obtain AT&T Local Exchange Services from the Company.

H. Expedite Charges

Notwithstanding any other provision of this tariff, rates and charges may be increased by the Company pursuant to Arizona Administrative Code, Title 14, R14-2-1109 and 1110. The rates and charges are applicable to each AT&T local customer per service expedite

7.4 Features

Optional features are available with AT&T Local Exchange Services. Customers may order features individually or as part of a Feature Package, as shown below. Feature Packages are not available for ACC Business. Monthly Recurring Charges associated with features are applied on a per-line basis, and are in addition to any other applicable charges. Customers who order AT&T Local Exchange Services associated with any of the following services will be charged the Monthly Recurring Charges shown in the Price List: AT&T OneNet Option¹. All other AT&T Local Exchange Services Customers will be charged as shown in the Price List. ACC Business¹ Customers will be charged as shown in the Price List. Usage charges also apply to some features. The Company is not responsible for the compatibility of products and services of outside vendors. The following optional features and feature packages may be ordered:

(D) (T)

¹ Effective October 22, 2008, the "AT&T OneNet Option" and "ACC Business" will be grandfathered, and the Local Exchange Services provided under that tariff will not be available to new customers. Customers with services provided under that Tariff will continue to receive the service(s) pursuant to the terms and conditions of their contract until their current contract expires. Upon expiration of the customer's current contract term and if the customer does not disconnect the service(s) (if available), customer will be billed at the month-to-month non-term.

EFFECTIVE: DECEMBER 30, 2015
BY: LINDA GUAY-TARIFF ADMINISTRATOR

SECTION 7
1ST REVISED PAGE 11
CANCELS ORIGINAL PAGE 11

7. AT&T LOCAL EXCHANGE SERVICES

7.4 Features (continued)

Incoming Call Redirect Option

Incoming Call Redirect (ICR) provides automated redirection of incoming calls to a pre-designated back-up site during T1 or PBX failures or when all trunks are busy. This option is available with DS1-Digital Facilities^{1,2}, ISDN PRI^{1,2} and Digital Trunks^{1,2} service only. (C)

ICR can redirect all or only pre-selected DID numbers, depending on the customer's application. Calls are redirected to another set of telephone numbers (Destination Numbers), and can route to the LEC trunks at the same location or distant locations. A separate route index will be set up for the redirection of selected DID numbers. Redirected calls will route to a single number at the pre-designated back-up site, and will deliver the original calling number if the back-up site is configured for PRI and Calling Party Number. It is the responsibility of the customer to obtain any necessary permission for the use of any Destination Number.

If ICR is ordered at two or more sites that provide back up to one another, the back up telephone number cannot be a number that can be redirected.

ICR is limited to a maximum of ten simultaneous redirected calls per T1, a maximum of twenty-four simultaneous calls for trunk groups of one to four T1s, and a maximum of forty-eight simultaneous calls for trunk groups of five T1s or more. A maximum of two (2) trunk groups per location can be equipped with ICR.

Customers will be responsible for all usage charges associated with redirected calls.

¹ Effective December 30, 2015, DS-1 Digital Facilities, Digital Trunks and only ISDN-PRI Service provisioned over Dedicated Entrance Facility (DEF) services are no longer available to new customers or for contract renewals. (N)

² Effective June 1, 2016, existing customers with DS-1 Digital Facilities, Digital Trunks and only ISDN PRI Service provisioned over Dedicated Entrance Facility (DEF) services may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds and changes described above. (N)

SECTION 7

1ST REVISED PAGE 25

CANCELS ORIGINAL PAGE 25

7. AT&T LOCAL EXCHANGE SERVICES

7.9 AT&T Local Exchange Services-ISDN PRI^{1,2}

(C)

Description

AT&T Local Exchange Services-ISDN PRI is an optional service arrangement for local exchange access based on the Primary Rate Interface (PRI) arrangement of the Integrated Services Digital Network (ISDN). AT&T Local Exchange Services-ISDN PRI is a high capacity access path for communications providing voice or data transmission over the Company's exchange network. AT&T Local Exchange Services-ISDN PRI is available where facilities and operating systems exist.

AT&T Local Exchange Services-ISDN PRI is an alternative for individual local exchange access loop services such as Direct Inward Dialing (DID) and Direct Outward Dialing (DOD). It can also be used as loop transport for circuit switched data.

AT&T Local Exchange Services-ISDN PRI is provisioned on the 1.544 megabits per second (MBPS) bandwidth and uses ISDN architecture of 23 B or bearer channels and 1 D or data channel (Primary) or 24 B channels (Secondary) to provide the Customer with the capabilities of simultaneous access, transmission, and switching of voice, data, and imaging services via channeled transport.

ISDN describes the end-to-end digital telecommunications network architecture that provides for the simultaneous access, transmission, and switching of voice, data, and imaging services. These functions are provided via channeled transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems that connect Primary Rate Interface lines to their serving central office.

The B Channel is a 64 kilobits per second (KBPS) channel used for information transfer between users and may be used in conjunction with circuit-switched service. The D Channel is a 64 KBPS per second channel that carries signaling and control for the B channels. The backup D Channel automatically takes over for a failed D channel in case of trouble and is purchased as part of a 23B+Backup D PRI Arrangement.

¹ Effective December 30, 2015, only ISDN-PRI Service provisioned over Dedicated Entrance Facility (DEF) service is no longer available to new customers or for contract renewals.

² Effective June 1, 2016, existing customers with only ISDN PRI Service provisioned over Dedicated Entrance Facility (DEF) service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds and changes described above.

SECTION 7

2ND REVISED PAGE 30

CANCELS 1ST REVISED PAGE 30

7. AT&T LOCAL EXCHANGE SERVICES

7.10 AT&T Local Exchange Services-DS-1 Digital Facilities^{1,2}

(C)

Description

DS-1 Digital Facilities is a digital service providing dedicated connections from an end user's digital Private Branch Exchange (PBX), key system, or hybrid device to the AT&T Local Service Switch Port.

The Customer may opt to utilize AT&T Local Exchange Services-DS-1 Digital Facilities for outgoing calls only (DOD), incoming calls terminated directly to an end user behind a PBX or capable key system (DID), a combination of both incoming calls to an attendant and outgoing calls (Two-way Combo) or a combination of both incoming calls directly to an end user and outgoing calls (DID/DOD). When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. AT&T Local Exchange Services-DS-1 Digital Facilities is available where facilities and operating systems exist. AT&T Local Exchange Services-DS-1 Digital Facilities includes Touch-Tone.

DS-1 Digital Facilities may be provisioned as a standalone service or provisioned over an existing or new Dedicated Entrance Facility (DEF) or Ultravailable Ring (UVN). Rates and charges are listed in the PRICE LIST.

Customers utilizing AT&T Local Exchange Services-DS-1 Digital Facilities must subscribe to a sufficient number of DS1 facilities to handle adequately the volume of traffic offered (received or originated) without interfering with any of the services offered by the Company. The number of DS1 facilities required to handle adequately such traffic will be determined by Company measurements. In the event that an inadequate number of DS1 facilities causes interference, the Company shall have the right to discontinue service without prior notification to the Customer.

AT&T Local Exchange Services-DS-1 Digital Facilities is offered in conjunction with an associated long distance service offering provided by AT&T: AT&T Business Network and OneNet Option.

At the Company's discretion, the Company may reconfigure the Customer's service to another service provided by AT&T or one of its affiliates authorized to provide you with AT&T Service prior to November 17, 2005 if the Customer's usage meets one or more of the following criteria: (1) equals or exceeds 90% utilization for inbound calling on trunks configured for Inbound and Outbound calling functionality, (2) equals or exceeds an average call duration of 10 minutes per call for inbound calling, (3) equals or exceeds CCS (one hundred call seconds or one hundred seconds of telephone conversation) loading of 32 CCS, or (4) equals or exceeds 300,000 minutes of use for inbound calling per DS-1 facility. The Customer will be charged rates for the alternative service as defined in the applicable tariff. The Company reserves the right to audit the Customer's usage for the above conditions.

¹ Effective December 30, 2015, this service is no longer available to new customers or for contract renewals.

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.

ABN Premier Bundle

ABN Premier Bundle may not be ordered on or after September 1, 2011. Customers who ordered the bundle before September 1, 2011 may keep it at their current location, may add lines and locations and may keep the service if they move locations.

ABN Premier is a bundled arrangement that provides an array of AT&T Affiliate products and services including AT&T Mobility Voice, and is ordered directly through AT&T's on-line Mobility web portal. Customer must agree to a 2-year ABN Premier term agreement and purchase online in order to qualify. Early Termination Fees may apply. The charges for local services are as specified in the Price List.

See the AT&T Business Service Guide for complete service description, explanation of service usage, and terms and conditions.

¹ See Price List for current rates.

² ABN Advantage Plan may no longer be ordered after July 8, 2005. Existing customs with ABN Advantage Plan in effect or on order prior to July 8, 2005, may continue their current plan under existing conditions.

³ For service availability and restrictions, see AT&T Local Exchange Services Description, Section 7, Page 25 and Page 30.

7. AT&T LOCAL EXCHANGE SERVICES

7.11 Maximum Rates and Charges¹ (continued)

7.11.13 AT&T Business Network Services (continued)

AT&T Business Network Express

ABN Express is a bundle service arrangement which requires Customer to enter into a term contract for an array of regulated and non-regulated products provided by multiple AT&T affiliates. The service is offered under a 2 year or 3 year term. Customer must contract for a minimum number of products across affiliates to be eligible. Early Termination Fees apply. The charges for the ABN local services which are included in the bundle are as specified in the Price List. Calling Card is not available under this offer.

All Non-Recurring Charges, including change order charges, can be found in the ABN Price Lists in this tariff, under the appropriate local service descriptions (i.e. AT&T Business Lines and Trunks, AT&T DS-1 Digital Facilities², AT&T ISDN-PRI).

7. AT&T LOCAL EXCHANGE SERVICES

7.14 ALS Digital Trunks^{1,2}

(C)

Digital Trunks service is a fractional digital switched service that provides trunk connections from an end user's Private Branch Exchange or capable Key System to the Company Switch Port. Digital Trunks service is delivered via a DS-1 (1.544 Mbps) facility providing up to 23 voice-grade DSO communications channels.

The customer may opt to utilize Digital Trunks service for outgoing calls only (DOD), incoming calls only (DID), or a combination of both inbound and outbound calls. When the customer elects to utilize Digital Trunks service for both inbound and outbound calls, they may choose Two-Way service which allows incoming calls to an attendant only or they can elect to utilize DID/DOD service which allows incoming calls to be terminated directly to an end user behind a PBX or capable Key system. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. Per subscribed Rate Center, the customer is required to subscribe to a sufficient number of trunks or channels so as not to degrade the Company's network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the customer to increase the number of trunks or channels to satisfy the call completion criteria listed above.

Refer to the PRICE LIST for rates and charges.

¹ Effective December 30, 2015, this service is no longer available to new customers or for contract renewals.

(N)

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.

7. AT&T LOCAL EXCHANGE SERVICES

7.15 Integrated Access Service^{1,2}

(C)

Integrated Access Service provides Local Voice Services on a customer's spare capacity AT&T channelized Static Integrated Network Access (SINA) or Frame Relay T1 or Frame Relay T1 access channels. The SINA or Frame Relay T1 or Frame Relay T1 access arrangement will include AT&T Local Services via Integrated Business Lines and Trunks and Integrated Digital Trunks. The service provides direct inward dialing capability as well as outward calling capabilities. Service charges are billed on a monthly basis, and are based on the service area in which the customer is located. The features and corresponding rates available for use with Business Lines and Trunks and Digital Trunks are also available for use with Integrated Access Service. There is no minimum channel size requirement for Integrated Access Service.

A. Integrated Business Lines and Trunks Service

Integrated Business Lines and Trunks service provides a customer with one or more analog, voice-grade telephonic communications channel(s) that can be used to place or receive one call at a time. Integrated Business Lines and Trunks service is provided for connection to customer-provided single-line terminal equipment such as station sets or facsimile machines. Integrated Business Lines and Trunks service is offered as either business lines, key lines, or business trunks. Customers utilizing Integrated Business Lines and Trunks service must subscribe to a sufficient number of access lines to handle adequately the volume of traffic offered (received or originated) without interfering with any of the services offered by the Company.

For Integrated Business Trunks service, the customer's M24/Channel Bank must provide DS-0 analog connections to an analog trunk card. The Local Network Service interface to the customer will be the SINA T1 or Frame Relay T1 interface. Channel Bank is not included with Integrated Access Service.

For Integrated Business Lines service, the customer's M24/Channel Bank must provide individual analog line side interface to each of the customer's station equipment such as single line telephone sets. The Local Network Service interface to the customer will be the SINA T1 or Frame Relay T1 interface.

¹ Effective April 28, 2007, Integrated Access Service is not available to new customers or for contract renewals.

(C)
(C)

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.

7. AT&T LOCAL EXCHANGE SERVICES

7.17 AT&T Enhanced Redirect Solution (AERS)

(C)

7.17.1 Description

AT&T Enhanced Redirect Solution will provide customers the ability to redirect incoming telephone numbers in the event their primary location is unavailable. AERS also provides the additional capability to redirect incoming traffic to a predefined redirect option within two minutes of completing the control call. Customers will be able to define and control how to route critical calls in the event of an emergency.

AERS provides the capability for the customer to predefine redirect telephone numbers for each incoming telephone number at their location. Calls can be redirected to any ten-digit North American Number Plan (NANP) telephone including toll-free numbers. The customer controls when to invoke and when to restore AERS via a telephone number or control activation number. However, the customer cannot revise the predefined redirect options without a service order.

The customer can create up to nine options including eight redirect options for each Customer Group. A Customer Group is a list of incoming telephone numbers and the customer can have up to 20 Customer Groups per customer location dependent on the total number of telephone numbers being redirected.

When a redirect option is invoked, all incoming telephone numbers within the Customer Group will be redirected to their respective numbers. Customers must use service orders to update Customer Group telephone numbers or redirect options within the Customer Group.

The location that receives the redirected calls must have sufficient lines and associated facilities to handle the estimated or actual number of calls without interfering with the exchange or toll service. In the event that there is interference with exchange or toll service, AT&T reserves the right to disconnect any redirect option immediately.

The customer controlled redirect option is available for business lines and trunks as well as incoming telephone numbers to a PBX or other CPE.

² Effective June 1, 2016, existing customers with DS-1 Digital Facilities, Digital Trunks and only ISDN PRI Service provisioned over Dedicated Entrance Facility (DEF) services may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds and changes described above.
