Energy Storage

DOCKETED BY

We understand that APS is currently developing a pilot program to evaluate residential level energy storage that is expected to be in place by mid-spring 2016. We direct APS to submit a report on the initial findings of that pilot program by October 1, 2016. The report is to be filed in the docket that will be opened to evaluate APS' 2017 REST plan. The report should provide as much detail as possible concerning the pilot program's initial findings regarding the benefits and costs of integrating energy storage at the residential level. If appropriate, based on the findings of the pilot study detailed in the report, APS should also propose a program that encourages the deployment of energy storage.

Page 12, Line 3 ½ INSERT:

IT IS FURTHER ORDERED that Arizona Public Service Company file with Docket Control in the docket that will be opened to evaluate APS' 2017 REST plan, as a compliance item, a report on the initial findings of the residential level energy storage pilot program as discussed above. If appropriate, based on the findings of the pilot study detailed in the report, APS should also propose a program that encourages the deployment of energy storage.

Make all conforming and numbering changes.
