DOCKETED BY

IN THE MATTER OF THE APPLICATION  
OF SOUTHLAND UTILITIES COMPANY,  
INC. FOR AN INCREASE IN RATES

DOCKET NO. W-02062A-15-0224

**COMMENTS TO STAFF'S REPLY**

Southland Utilities Company, Inc. ("Company" or "Southland") hereby files its  
comments to Staff's Supplemental Report filed on December 22, 2015 ("Staff's Reply").

**CIAC and Amortization**

The current issue regarding CIAC stems from the controversy relating to historic  
arguments concerning the WIFA surcharge. When the WIFA surcharge policy was being  
developed, several companies argued that the WIFA surcharge should include the debt  
service reserve payment obligation demanded by WIFA. In contrast, Staff took the  
position that the debt reserve payments should not be included in the surcharge. At first,  
the Commission sided with Staff. Once WIFA became aware of the issue, WIFA urged

1 the Commission to allow the reserve payments to be included in the surcharge. WIFA  
2 surcharges became more and more common place over time, and as suggested by  
3 companies and WIFA, a few years ago both Staff and the Commission adopted the policy  
4 position that the debt reserve should be included in the surcharge.  
5

6           Unfortunately, Southland's prior rate case occurred before the policy about the  
7 WIFA surcharge was settled. In 2001, at the Open Meeting during its last rate case, Staff  
8 argued for the first time that it would not support plant becoming part of Southland's rate  
9 base unless the Company used its own money to add the plant. In other words, plant  
10 installed with debt funding would have the principal portion paid for with surcharge  
11 funds be considered CIAC. This was a very unusual position (to our knowledge a one-  
12 time proposal). Southland opposed the position of course, arguing that the rate-making  
13 treatment for the plant built with WIFA surcharge funds should be addressed in the next  
14 rate case, which is common Commission practice. Nevertheless, the Commission  
15 followed Staff's position. Thus, in this one case, the principal portion of loan payments  
16 for plant installed by a small water company using debt is deemed CIAC and not  
17 included in its rate base.  
18  
19  
20  
21

22           Southland believes the Commission should not perpetuate this condition. First and  
23 foremost, the Commission's current policy is to include the reserve fees in the WIFA  
24 surcharge, which is what Southland was arguing in its last rate case. Second, the  
25 Commission's current policy is to encourage small companies to increase their rate base.  
26 Third, the unique nature of how this CIAC is treated for installed plant causes undue  
27 tracking and reporting expense above the norm. Simply stated, there is no reason to  
28

1 subject this Company to such a condition on an ongoing basis when this Commission's  
2 policies are identical to what the Company was arguing back in 2011.

3  
4 Here, Staff acknowledges this condition is unusual. In the reply, Staff writes  
5 "Staff agrees that this ordering language may be unique and suggest that some additional  
6 regulatory accounting might be required to identify and track the level of plant paid for  
7 with the WIFA surcharge funds." Staff's Reply at p. 2. It is important to note that at no  
8 point has Staff explained why perpetuating this policy for this one company makes sense.

9  
10 In addition to whether this policy should continue to be applied to this sole  
11 Company, Staff and Southland also disagree on the amount CIAC that should apply in  
12 this case. Staff recommends \$104,130 and Southland is proposing \$63,415, a difference  
13 of \$40,715. The Company believes only the principal portion of the loan payments for  
14 the plant installed with proceeds from the WIFA loan through the end of the test year  
15 should be considered CIAC. On the other hand, Staff believes that the same principal  
16 portion of the loan payments for the plant installed with WIFA loan proceeds through  
17 January 2016, when a Decision was originally expected, should be considered CAIC.  
18 Staff still has not provided support for how the recommended amount of \$104,130 for  
19 WIFA related CIAC was calculated. Staff's reasoning for choosing this date per the  
20 Response is that "the language in that decision does not suggest that the directive was  
21 only to apply through the end of the Company's next test year." In truth, the decision is  
22 silent on the matter. Thus, the Commission should follow its normal practice and not  
23 consider the rate case treatment of post test-year CIAC related to WIFA funded plant. In  
24 addition, Staff used projections for the amount of loan payments for 2015 and 2016 (and  
25  
26  
27  
28

1 the resulting CIAC from the principal portion) that were not correct due to continuing  
2 loan draws throughout 2015 resulting in changing loan payment amounts. Knowing Staff  
3 has not supported its projected WIFA CIAC amount, the Court should adopt the  
4 Company's position.  
5

6 Staff points to its rate base Adjustment B to explain the \$5,884 difference between  
7 the Company and Staff proposed accumulated amortization of CIAC to reflect  
8 amortization of the CIAC imputed in rate base Adjustment A. This statement implies  
9 that the total \$5,884 is attributed to the \$104,130 of additional CIAC resulting from the  
10 WIFA payments. If this is the case, none of that CIAC is old enough to be fully  
11 amortized. As detailed on Schedule 2 of the Company Response (November 24, 2015),  
12 the only CIAC that is no longer being amortized is the \$72,721 resulting from a line  
13 extension in 1984. All other CIAC, including the CIAC attributed to the WIFA loan, is  
14 still in the process of being amortized. Staff used an incorrect fully amortized  
15 contribution amount of \$78,605 in its calculation of CIAC amortization. As pointed out  
16 in its response to the original Staff Report, Southland also disagrees with the Staff  
17 determined depreciation rate and resulting CIAC amortization rate of 5.65%, as the  
18 Company amounts are much more detailed and precise. Southland proposes the non-  
19 fully amortized CIAC related to prior line extensions continue to be amortized at 2.00%  
20 per year and the WIFA related CIAC at 5.01%.  
21

22 Finally, Southland is not attempting to "rescind or modify" the CIAC order in  
23 Decision No. 72429. Instead, Southland seeks to cease the surcharge in this rate case and  
24 stop the accumulation of surcharge funds that will result in future CIAC. Any rate  
25  
26  
27  
28

1 treatment of the principal portion of WIFA loan payments after the 2014 test year should  
2 be determined in the next rate case consistent with common Commission practice.  
3

#### 4 **Cash Flow Analysis**

5 Staff points to page 24 of the application as the source of the debt service amount  
6 of \$83,591. Southland agrees that this was the actual amount recognized for the test year  
7 2014. However, as mentioned above, the Company continued to draw on the WIFA loan  
8 and payments were adjusted several times during the year. As of August 2015, the  
9 monthly payment amounts were finalized at \$7,646 per month and will continue at that  
10 amount for the duration of the loan. As a result, \$91,952 will be the WIFA debt service  
11 amount each year going forward. Additionally, the cash flow amount recommended in  
12 its original Staff report of \$76,581 on JLK-7 is overstated and would actually be \$68,580,  
13 \$8,001 less. The Company proposed cash flow amount of \$76,298 is reasonable and  
14 approximates the Staff recommended amount when the correct debt service amount is  
15 used.  
16  
17  
18

#### 19 **Rate Design**

20  
21 To be clear, it is critical that the Company's proposed revenue and Staff's  
22 proposed revenue match. Admittedly, the Company had an error in the bill count  
23 calculations initially, which was corrected. After the correction, there was still a  
24 mismatch, but Staff explained that its proposed rates generated slightly more than the  
25 revenue requirement, which is why the Company questioned whether there was an issue  
26 with the billing determinants or bill count calculations. Once Staff explained why there  
27 was a slight difference, it was clear calculations made by Staff and Southland were  
28

1 indeed for all intents and purposes the same. The Company still urges the Court to adopt  
2 its rate design.

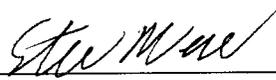

3  
4 The Company agrees that the proposed rates for service line and meter installation  
5 charges set forth in the Engineering Report are correct and consistent with the  
6 Company's current and proposed rates. Meanwhile, the charges in Schedule JLK-4 are  
7 inconsistent with Staff's recommendations as reflected in the Engineering Report.  
8  
9 Therefore, the Company's position, which is consistent with the Engineering Report,  
10 should be adopted.

11 **Resolved Issues**

12  
13 Staff's Reply revised earlier positions and removes the BMP requirements and  
14 allows for the rates to go into effect during the next billing cycles. The Company agrees  
15 with these positions.

16
