DOCKET CONTROL

RE: E-01345A-15-0095, In the matter of the application of Arizona Public Service Company for approval of, with minor modifications, continuance of the company's 2013 Demand Side Management Implementation Plan through 2015

Dear Chairman and Commissioners,

The Southwest Energy Efficiency Project (SWEEP) would like to thank the Commission for its unanimous support of Arizona Public Service Company's (APS) 2015 Energy Efficiency Implementation Plan.

The approved plan will help more customers save money and energy on their utility bills. For example, the plan includes support for more comprehensive retro-commissioning projects in industrial facilities and expanded opportunities for renters, schools, and small businesses to save on lighting costs.

We also commend the Commission for its work on several amendments to improve the plan. These amendments were all unanimously supported and will:

- Facilitate more timely and effective consideration of future demand side management plans;
- Lead to the launch of a special energy efficiency pilot program for schools;
- Ensure adequate consumer protections are in place for APS' consumer education and pre-paid electricity program; and
- Allow continued conversation on funding options for future DSM efforts.

Thank you again for your leadership on these important issues. All APS consumers and businesses benefit when we eliminate energy waste, and we commend you for your efforts.

Sincerely,

Jeff Schlegel and Ellen Zuckerman
Southwest Energy Efficiency Project
