Subject: Please Support Keeping TEP on track with energy efficiency
E- 01933A-15-0178

Dear Acting Chairman Little and Commissioners:

My name is Camille Kershner and I am a TEP customer.

Energy efficiency programs help Arizonans reduce our electricity use through installation of efficient lighting and appliances, more efficient air conditioners, and by repairing leaky ductwork.

I urge you to support adding new cost-effective opportunities to the TEP portfolio and to expand on the success of current energy efficiency programs and policies. These efficiency programs create jobs in Arizona communities and help our economy overall by keeping more of our energy dollars right here in our state. Finally, because they save energy and reduce demand for electricity, these programs help drive down energy costs for everyone by allowing us to invest in renewable energy sources.

The Arizona Energy Efficiency Standard and these programs have already saved Arizonans hundreds of millions of dollars in lower utility bills, reduced air pollution, and water savings. I personally have utilized the CFL program and have seen a reduction in my energy use, leaving more dollars to spend on necessities like charging my electric car, which I take to the park-n-ride to ride the bus and streetcar to work and other activities around town. I would like to see more program offerings to help me and other TEP customers further reduce our energy use, so that our collective savings can be used to provide more sustainable transportation options throughout our sunny state.

Please work to allow the expansion of cost-effective energy efficiency programs in the TEP service area and approve funding to continue existing programs.

Thank you for your consideration,

Camille Kershner
